WE'VE THOROUGHLY EXAMINED EVERY SINGLE VIDEO GAME RELEASED IN 2002 TO BRING YOU VGU'S COMPILATION OF THE ULTIMATE GAMES OF THE YEAR. FIGHTS WERE HAD, TEARS WERE SHED AND FRIENDSHIPS AMONG STAFF MEMBERS WERE STRAINED, BUT WE'VE NARROWED THE LISTS OF OUR FAVORITES DOWN TO THE TOP TITLES FOR EACH SYSTEM. THE ONLY THING NOT INCLUDED IS ENOUGH MONEY TO BUY ALL THESE MUST-HAVE TITLES.

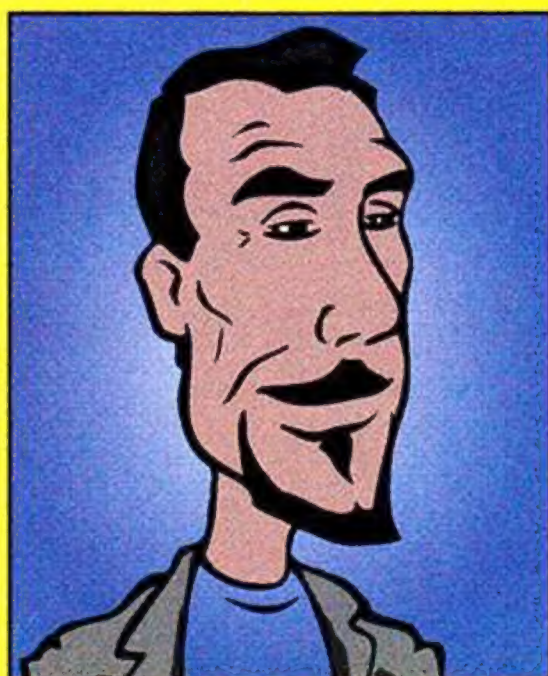

"CODE WARRIORS"

JADA MIST

Get ready for Jada to be on billboards everywhere. A chance meeting with a *Rolling Stone* reporter after a gig with her new band, called I Hate My Parents, saw a small mention made of her in their "Bands That Could Almost Maybe Get Popular Some Day" column. Thankfully this newfound fame hasn't gone to Jada's head, as she's still keeping it real by playing Golden Sun all day and night.

BENJI GREGORY

After spending three weeks in Las Vegas (the city that never sleeps), B.G.'s been caught sleeping in his cube on a daily basis. At first we thought he was exhausted from all the work he put into the Buyer's Guide this issue, but when three ladies all claiming to be Mrs. Gregory bumped into each other at the front desk, we knew the reason. . . .

HERBERT ZITOWSKI

Zitowski's gone over to the dark side of gaming lately, with *Neverwinter Nights*, *Warcraft 3* and *Magic: The Gathering* on the PC all taking up his time. Indeed, his life is now consumed with hit points, mana and rebooting every five minutes after Windows keeps crashing. We're confident that *Final Fantasy XI* will swing him back to the world of consoles.

MAYNARD TUCK

He's Canadian, so of course he's against violence and obscenity. That *Dead to Rights* game, though, and *Hitman 2* have Maynard thinking violence isn't so bad after all. They say violent games make you hurt people, but even a doofus like Maynard knows the difference between video games and reality. His maw and paw raised him right, so he can play things like *Dead to Rights* and it's okay.

"BLEACH"

This summer was a mixed affair for Bleach. At an end-of-summer shin-dig in LA he introduced himself to Andrew House (Sony's VP of Marketing for all of North America) by asking him who he worked for. Then he picked up a hot little number at a party not realizing it was Zitowski in drag. Now if only that cute chick from *Marvel vs. Capcom* would call. . . .

PRISCILLA BUSSY

After her dance routine to "Who Let the Dogs Out?" failed to get her a spot on *American Idol*, Priscilla has decided not to quit her day job here at *VGU* just yet. Although being able to push the new guys on staff around has given her ego a little boost, her inability to understand that there's no way to "finish" Mrs. Pac-Man is keeping Ms. Iowa 1999 in her place.

PLAY LINE LOW NEUTRAL HIGH INSANE

"This game rocks, man. I've spent more money on *Virtua Fighter* than on beer."

Just what exactly is that meter doing next to our CODE WARRIOR'S mugshots throughout the mag? It's simply rating our anticipation or excitement over the game, that's all. Since our staff isn't licensed to review games by the Official Video Games Raters Committee Authority, these scores are not to be taken as review scores by any means.

CONTRIBUTORS

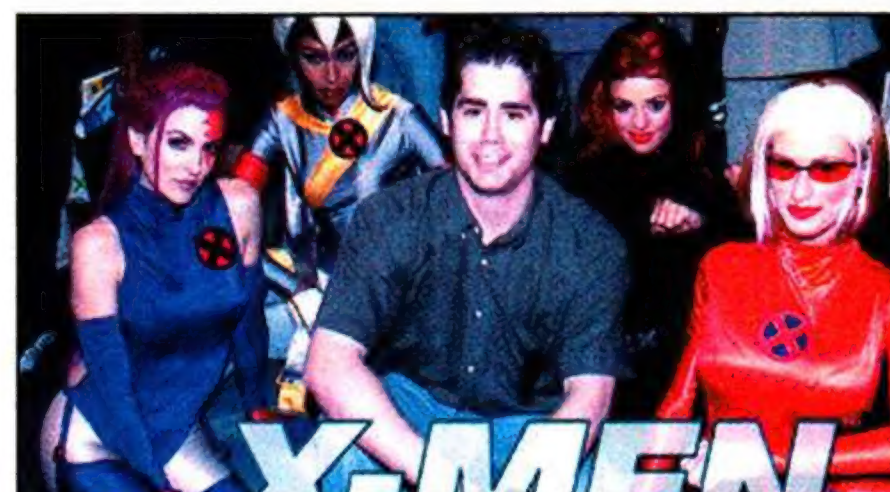

Frank Provo: Strategy Editor

In response to your kind-hearted pleas, we've redone our format to include more previews and features. This change kind of leaves your friendly neighborhood strategy editor with little to do this issue. But do not fear, true believers, because next issue will have a completely metamorphosed Strategy Section! You must see it to believe it.

Cameron Davis: News Editor

It's been a fun-filled couple of months for *VGU*'s resident Australian. Doing all the stunts in the *Crocodile Hunter* movie has left him with little time to play the didgeridoo or race kangaroos around the farm, but he remained happy nonetheless. Maybe it's got something to do with a new Ape Escape coming along. . . .

Doug Trueman: Previews Editor

With the winter closing in and the E3 booth babes again under wraps, Doug has returned to Canada to await a slew of Capcom sequels: *Onimusha 2*, *Devil May Cry 2* and *Resident Evil Zero*. And that whole hockey thing? He can't even skate backwards. What's that about?

Dan Leahy: Assistant Editor

The former beer-drinkin sports-fanatic-turned-editor has joined the "elite" ranks of *VGU*'s chosen few. And to think, he almost considered a job at some Web 'zine answering tough questions like, "is *Royal Tennenbaums* better than *Rushmore*?" We're sure glad he came to his senses and suited up for a formal interview with *VGU*'s top brass. . . .

Scott Steinberg: Editor at Large

Scott's been up to no good lately. Further cementing his reputation as a "player," he's composed everything from our Robotech feature to a lovely treatise on "How to Pick Up a Hot Bartender" for one of those men's magazines. The secret? We'll give you a hint—it doesn't involve bragging about that high score you racked up on *Smuggler's Run*. Still not satisfied? OK, one last insider tip; pass on the cosmopolitans (a Shirley Temple's much tastier!).

Mark Manzo: Assistant Editor

Mark's thrilled to be a member of the *Video Games Underground* staff. As a newbie from one of those "other" magazines, Mark's been fetching coffee, mowing lawns and even grabbing colored pencils for the staff to prove his salt when not working on his *Dead to Rights* strategy. We think he'll work out fine, as long as he doesn't threaten us with that crazy hair of his.

THE SOURCE FOR NEXT-GENERATION GAMERS:**SO MANY GREAT GAMES...SO LITTLE TIME...**

ALL systems are on overload! There are too many games out, too many games coming out, and too many games that we don't even know about (well, we know about everything here at *VGU*, but we still get surprised every once in a while). That's why our editorial team has put in massive overtime this issue to bring you the first-annual *VGU* Holiday Buyer's Guide. Simply put, it's a checklist of the very best games released this year and our explanations as to why they belong on your wish lists.

Around this time every year, we look at the quality of the games on the market and wonder how games could possibly get any better. Yet the following year's crop of games always finds a way to take us one step closer to gaming nirvana—either with stunningly beautiful graphical improvements, the depth of a complex new storyline, or the improvement in gameplay or control.

A Robotech fan before there was Robotech, young "RoboDan" is shown here with a spiffy homemade robot suit complete with a hair style to make any retro fan envious.

This year, the three-way battle between Sony PlayStation 2, Nintendo's GameCube and Game Boy Advance, and Microsoft's Xbox intensified, with an avalanche of great new titles for these consoles hitting the market. The resurgence of the PC as "an ultimate gaming machine" adds to the battle for your gaming dollars as well. (We've included PC games in our Buyer's Guide this issue, so fear not Windows users.)

All these factors give good reason to make sure you're well-educated before venturing to your local "electronic entertainment" store of choice. After all, there's nothing worse than plunking down your hard-earned cash on a stinker of a game. And there's nothing better than spending your spare time experiencing one of this industry's true gems.

In this issue, we're also sharing our excitement about the latest licensed game gone good. (Amidst the deluge of unoriginal games with popular TV or movie names slapped on them to prompt sales, there are some good games in this category after all.) Our exclusive coverage of Robotech: Battlecry is proof positive that TDK is attempting to make Battlecry more than just a rock-'em-sock-'em robots rip-off. We've spent some time with the development team of this title, and they are just as eager to play the final game as we are—and that's a good thing. After all, if the people making the game aren't interested in playing it, it's kind of like a cook not wanting to eat his own cooking.

HOLIDAY BUYER'S GUIDE

Size matters, or so Microsoft hopes. The "X-Barge" has made some nice inroads in its first year on the market, but to exceed Dreamcast numbers M\$ needs big-time, Xbox-only games to sell its system. Or maybe they'll just start giving systems away...we wouldn't put anything past Mr. Gates, and all signs point toward Microsoft being in this for the long haul.

BLINX: THE TIME SWEEPER

Microsoft - October 8, 2002 - \$49.99

Expect to see more of this innovative trend...taking control of time/gameplay elements via the power of the Xbox's hard drive. Blinx features a cool new mascot whose best trick is twisting time to solve gameplay puzzles. The concept is great and leads to hilarious moments of realization "oooooh, so that's how you.." kinda stuff. Aside from that, this title looks prettier than the grass is green, and features a lovable new character.

XBOX TOP 10

BRUTE FORCE

Microsoft - November 5, 2002 - \$49.99

Another Xbox exclusive bound to generate some serious buzz, Brute Force sizzles with commando-based action. Fight in a third-person view which combines the use of tactical planning, all-out assault and finely tuned sniper skills. There's an awesome four-player co-op mode to complement single-player and deathmatch offerings. This year's answer to Halo? We'd say yes.

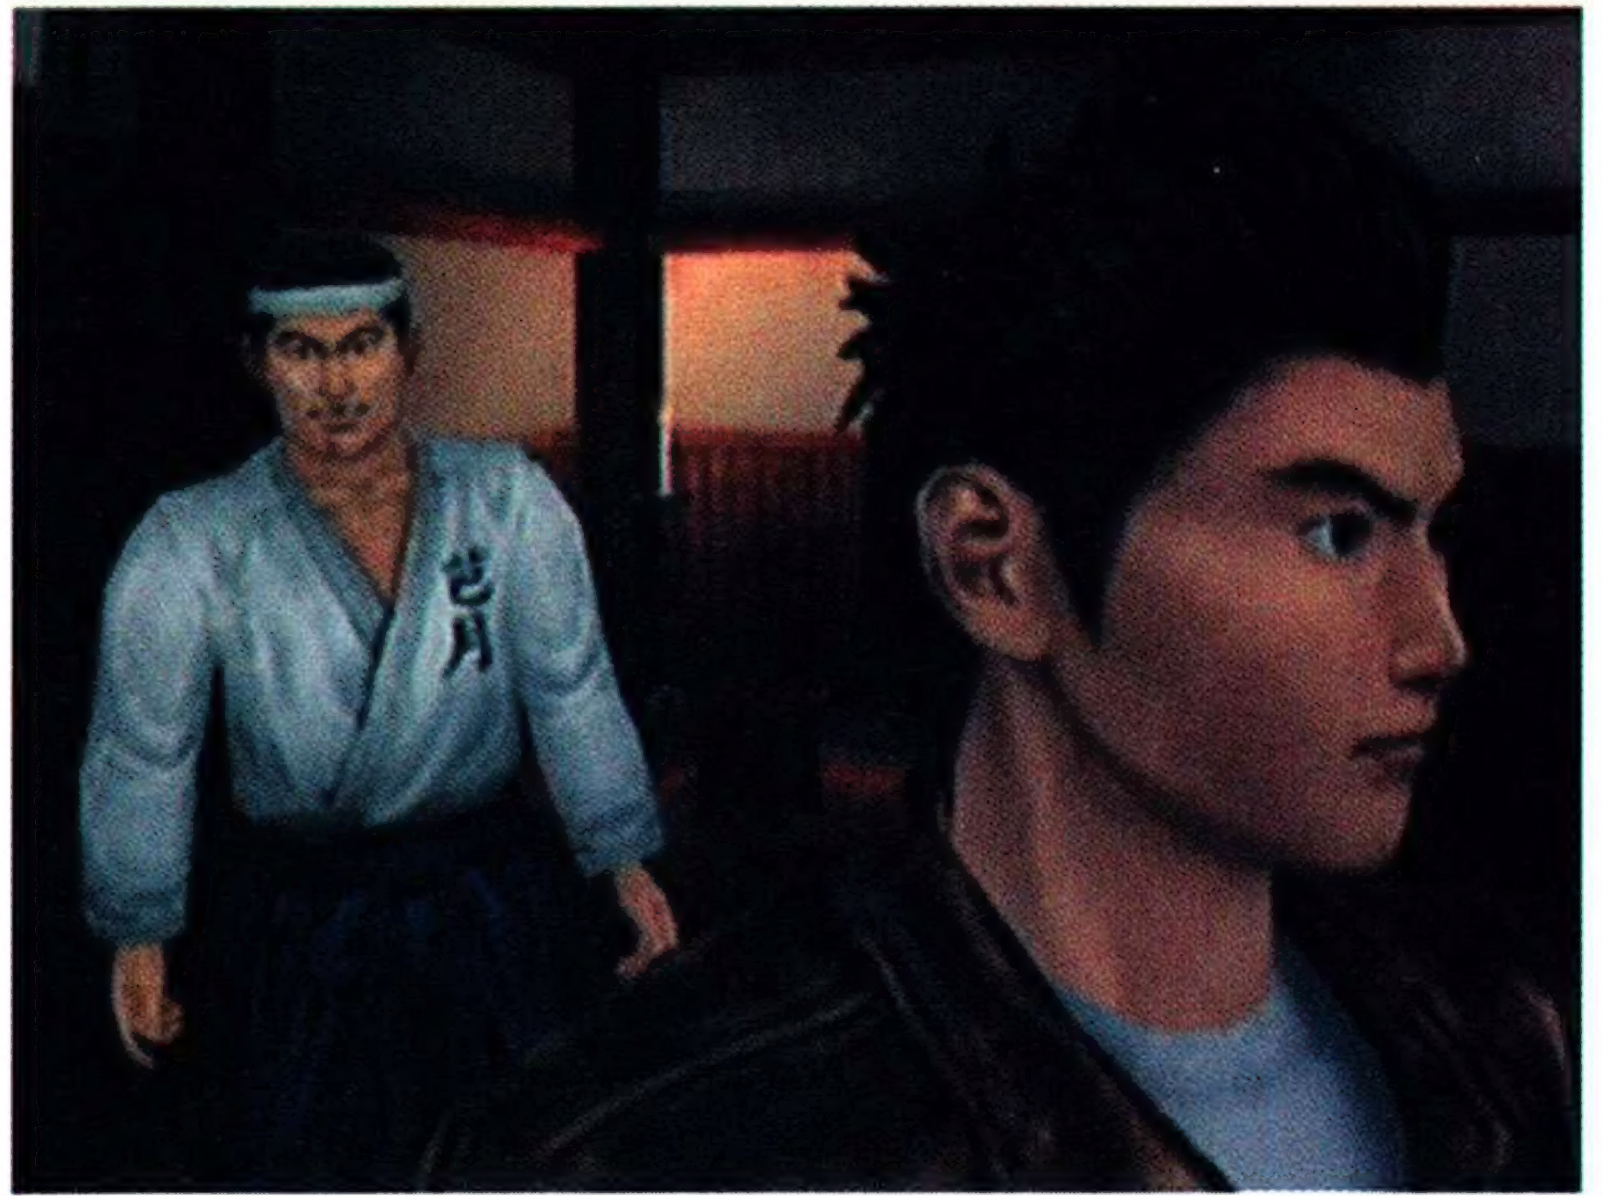

HOLIDAY BUYER'S GUIDE

SHENMUE 2

Sega - October 5, 2002 - \$49.99

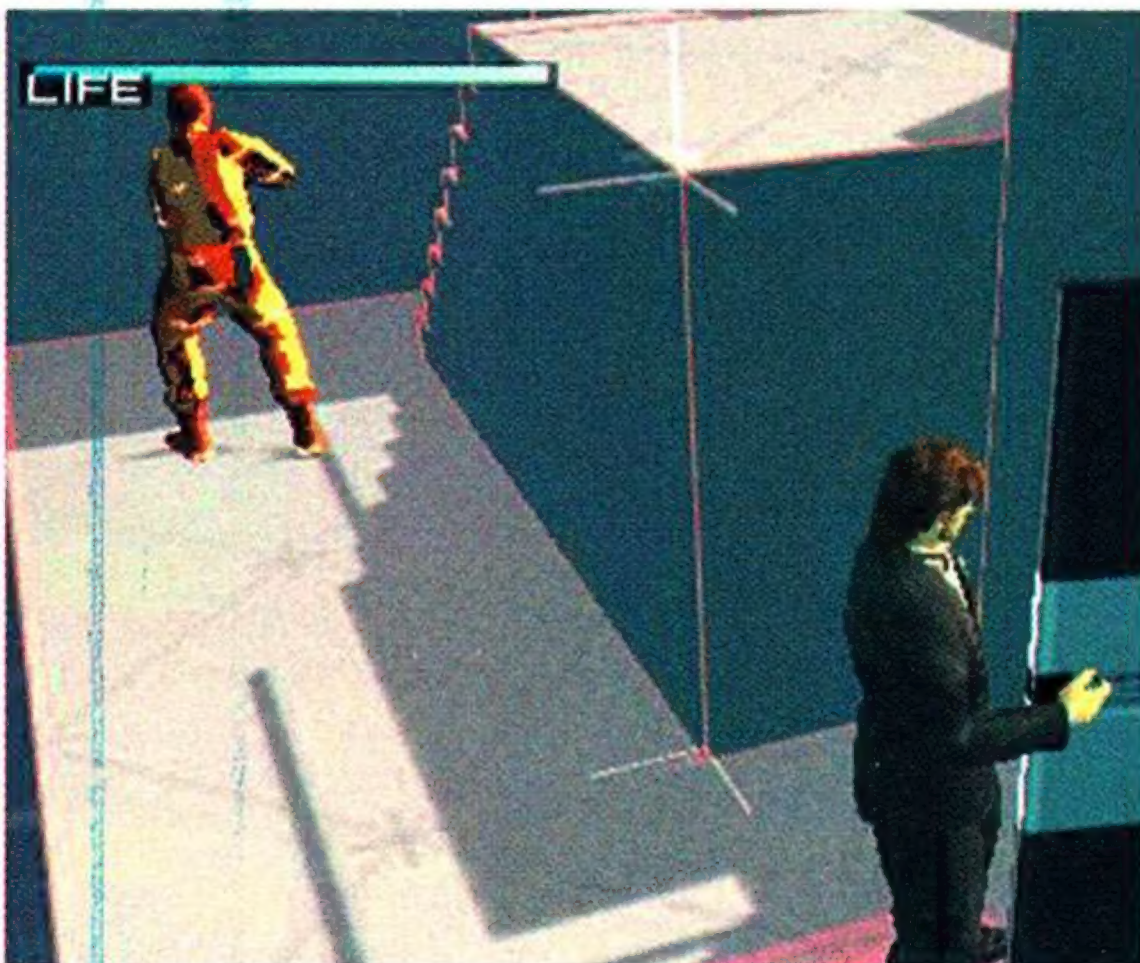

The original Shenmue hit the Dreamcast amidst a tidal wave of hype and claims of it being truly revolutionary. Well, it wasn't. It was a rather nifty combination of RPG and fighting game with a LOT of immersive details thrown in. Those details, like being able to get a job, shadow the 1,000s of residents during their daily lives and so on, should multiply tenfold on the box. If so, then guiding Ryo (leather-clad martial-arts expert) could become the mind-bending experience it was meant to be. Sign us up.

METAL GEAR SOLID 2: SUBSTANCE

Konami - November, 2002 - \$49.99

OK, while this one strays a bit from our premise of the Xbox needing exclusive games, it's still, technically, an exclusive. That said, it's more director's cut than original material. Still, with 200+ VR missions, new scenes and scenarios, and the ability to have Snake grind through a level Tony Hawk-style, we're figuring this is a must-have. Not to mention the fact that you can actually play as Snake and ditch that whiny Raiden punk.

XBOX TOP 10

NBA 2K3

Sega - October 22, 2002 - \$49.99

This is the best version of the best-playing basketball game on the planet. Not enough? How about online play via Microsoft's Xbox Live broadband gaming service? That's right, hook up with your friends (and enemies) and talk some mean trash while getting your funk dunk on. The only question here is whether Sega's cover boy will be playable with a special white-and-black prison outfit.

STAR WARS GALAXIES

LucasArts - December 5, 2002 - \$49.99

Brought to you by the folks behind the Everquest series, Star Wars Galaxies should become one of Xbox Live's hottest titles. Set in the Star Wars universe, you can be a Jawa, Droid, Jedi or any number of cool characters. This one has massive potential.

UNREAL CHAMPIONSHIP

Infogrames - October 29, 2002 - \$49.99

Another online title? You bet. With Xbox Live making a big push this fall, it's easy to see why we have one of the best first-person shooters of all time listed here. Frag baddies, drive insane vehicles, and lay waste to alien worlds. It's not as Halo-esque as it sounds, however, offering a much more robust multiplayer set of options.

PANZER DRAGON ORTA

Sega - Fall, 2002 - \$49.99

Another proud Sega franchise makes its debut on the Xbox with the release of Panzer Dragoon Orta. Fans won't be surprised to learn that Orta is an on-rails shooter, despite offering multiple paths and a solid degree of flying freedom. You'll still eventually end up in the same place, but that place involves some of the most spectacular graphics this side of George Lucas. Impossibly distant horizons loom as you guide your dragon through epic, blood-curdling aerial battles.

DEAD OR ALIVE BEACH VOLLEYBALL

Tecmo - October 22, 2002 - \$49.99

Tecmo's done the bouncing boobs thing before, but it's kind of a shock to see them port their Dead or Alive fighting gals over to the sand and surf of beach volleyball. Whatever their reasons, at least this will allow you to erase all memory of that male-happy beach-volleyball scene in *Top Gun*. Chicks, bikinis and a rather deep volleyball engine (is there such a thing?) are enough to hold our interest.

SPLINTER CELL

Ubi Soft - November 12, 2002 - \$49.99

Based on the ongoing Tom Clancy series of games, Splinter Cell takes tactical espionage to new heights. You are Sam Fisher, a secret agent of the National Security Agency. What's at stake? Merely the balance of world power (shocker). Retinal scanners and other high-tech gizmos delight throughout this taut action-adventure. We can't wait to devour each of the game's 14 missions.

HOLIDAY BUYER'S GUIDE

It's the 300-lb. gorilla, Sony's black box of doom, the "deuce" and all that. It's the PlayStation 2 and chances are you probably already have one. What you don't have is hands-on time with the top PS2 games coming out for the rest of this year. Well, we've gotten our grubby paws on just about everything, and here's what we're recommending:

THE GETAWAY

Sony - December 14, 2002 - \$39.99

The Getaway mixes guns and graphics for an enticing cocktail of video-game fun. Don't mistake this for a London-ized version of GTA 3. The Getaway does have its share of high-voltage car chases and third person action, but a strong plot and movie-stylized pacing take the place of GTA 3's random violence. We're not about to say that *The Getaway* will supplant GTA 3 as one of our all-time favorites, but we have no problem recommending it as one of the year's best.

KINGDOM HEARTS

Squaresoft - October 14, 2002 - \$49.99

This one is sure to steal your hearts (pardon the pun) come this fall. The folks at Squaresoft know how to deliver an RPG, and Kingdom Hearts looks ready to fall in line with Final Fantasy as a top franchise. Disney characters and Square stars team up in a delightful RPG romp through lush, movie-themed environments. C'mon, who doesn't want to see Bambi doing battle next to Squall?

HOLIDAY BUYER'S GUIDE

SOCOM: U.S. NAVY SEALS

Sony - August, 27, 2002 - \$59.99

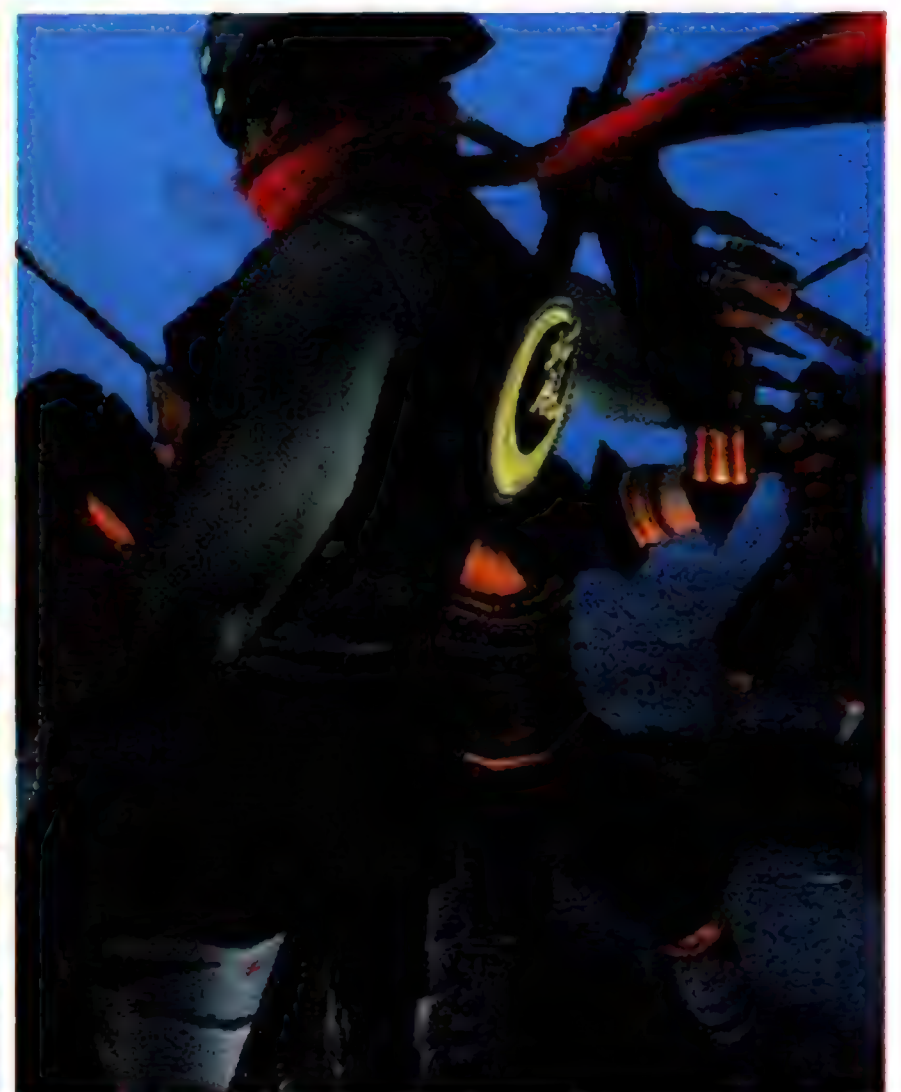

Viva la revolución! Por qué? We're talking about the impending online revolution, and we're betting on SOCOM to help lead the way. There's a single-player game here somewhere, and we're sure it's good, but the multiplayer online mode is what makes us wanna jump up and run around the room. Whether you're the terrorists or the good guys, shooting fellas amidst jungles and other varied terrain never gets old. Throw in a headset to bark out orders and we're hooked. Broadband only need apply here.

SHINOBI

Sega - Fall, 2002 - \$49.99

Sega's Ninja masterpiece is reborn on the PS2, and if you haven't learned by now, ninjas rule. Yea, they can totally flip out and kill people for no reason. The good news here is you are Hotsuma, the ninja doing the flipping out. He's a badass character and you've got plenty of skills to master. Throw knives, master swordplay, use magic, and become one with the shadows to overpower any and all enemies. Good stuff here.

STAR WARS: BOUNTY HUNTER

LucasArts - November 15, 2002 - \$49.99

Star Wars games have never been known as industry leaders for quality, but Bounty Hunter looks to change all that. The focus here is on heavy-duty action. Strap on your jetpack and assume the role of that notorious intergalactic bounty hunter, Jango Fett. Six unique worlds and 18 levels will show you a darker, more sinister side of the SW universe, one where guns talk and BS walks.

SLY COOPER AND THE THIEVIUS RACCOONUS

Sony - September 15, 2002 - \$39.99

We know that Ratchet and Clank might be getting more hype, but our trained eye leads us to believe Sly Cooper's the game to watch. While not fully cel-shaded, it's a remarkably slick "Sly shading" which helps give this game a unique look. No-frills gameplay follows, as you guide Sly through one part action, one part stealth and one part run 'n' jump.

CONTRA: SHATTERED SOLDIER

Konami - November 15, 2002 - \$49.99

Military might is a popular theme these days, even when set among the fantasy carnage of the Contra world. Konami has re-enlisted the original Contra team (and artist Ashley Wood) to bring this series into the here and now. A carnival of weapons and a blistering set of 2D action greet anyone looking for a challenge. The reward for meeting any level's sundry challenges? A massive, crap-your-pants boss. Oh yeah!

TOMB RAIDER: ANGEL OF DARKNESS

Eidos - November 12, 2002 - \$49.99

Selling stale bread as croutons is pure genius. Selling stale games (Tomb Raider sequels) as new material is not. Well, there's no number attached to this one, signifying a fresh start for our favorite video-game vixen. Lara's sharing the main stage with new character Kurtis Trent, which should allow some nice level-to-level variety. A healthy dose of Metal Gear-inspired sneakiness doesn't hurt, and when all else fails, Lara's got some, ahem...guns to fall back on.

MADDEN NFL 2003

EA SPORTS - August 13, 2002 - \$49.99

So why would we list an old, well-known, sports franchise here? Because this year marks the beginning of something special—Madden online. Yep, that means we'll be thrashing readers and any other newbies coast-to-coast with our smashmouth brand of football. Whether you're 56k or Broadband, Madden's smooth and hella fun online. Online aside, this is the best gridiron game going, featuring minicamps, franchise mode and a ton of gameplay improvements to satisfy hardcore ballers.

LORD OF THE RINGS: THE TWO TOWERS

LucasArts - November 5, 2002 - \$49.99

Moviegoers had their fun, and now it's our turn. Become one with Aragorn, Legolas, Frodo and Gandalf in an effort of immense scope and magic. The small area of this we played was impressive, perfectly replicating the mayhem of being in the movie. Dozens of Orcs swarmed to and fro, battling amidst the falling rain and ominous thunder. The game features 16 mission locations, each of which translates directly from the first two feature films. Cool.

HOLIDAY BUYER'S GUIDE

Nintendo's long-standing tradition of quality over quantity hasn't gotten them too far in the current next-gen race for supremacy. After nearly a year of waiting for great first-party titles, GameCube fans are about to be rewarded. This fall and winter season should yield a shopping cart full of goodies.

THE LEGEND OF ZELDA

Nintendo - February 1, 2003 - \$49.99

It might not be slated to release this year, but it's still at the top of any GameCube owner's list. Zelda's back in action, sporting one of the most controversial new looks around. Call it Cel-da or too cartoony or whatever...we'll call it \$ell-da, because it's gonna be huge. Take on the role of Link in a quest to save his younger sister. It's Zelda. 'Nuff said.

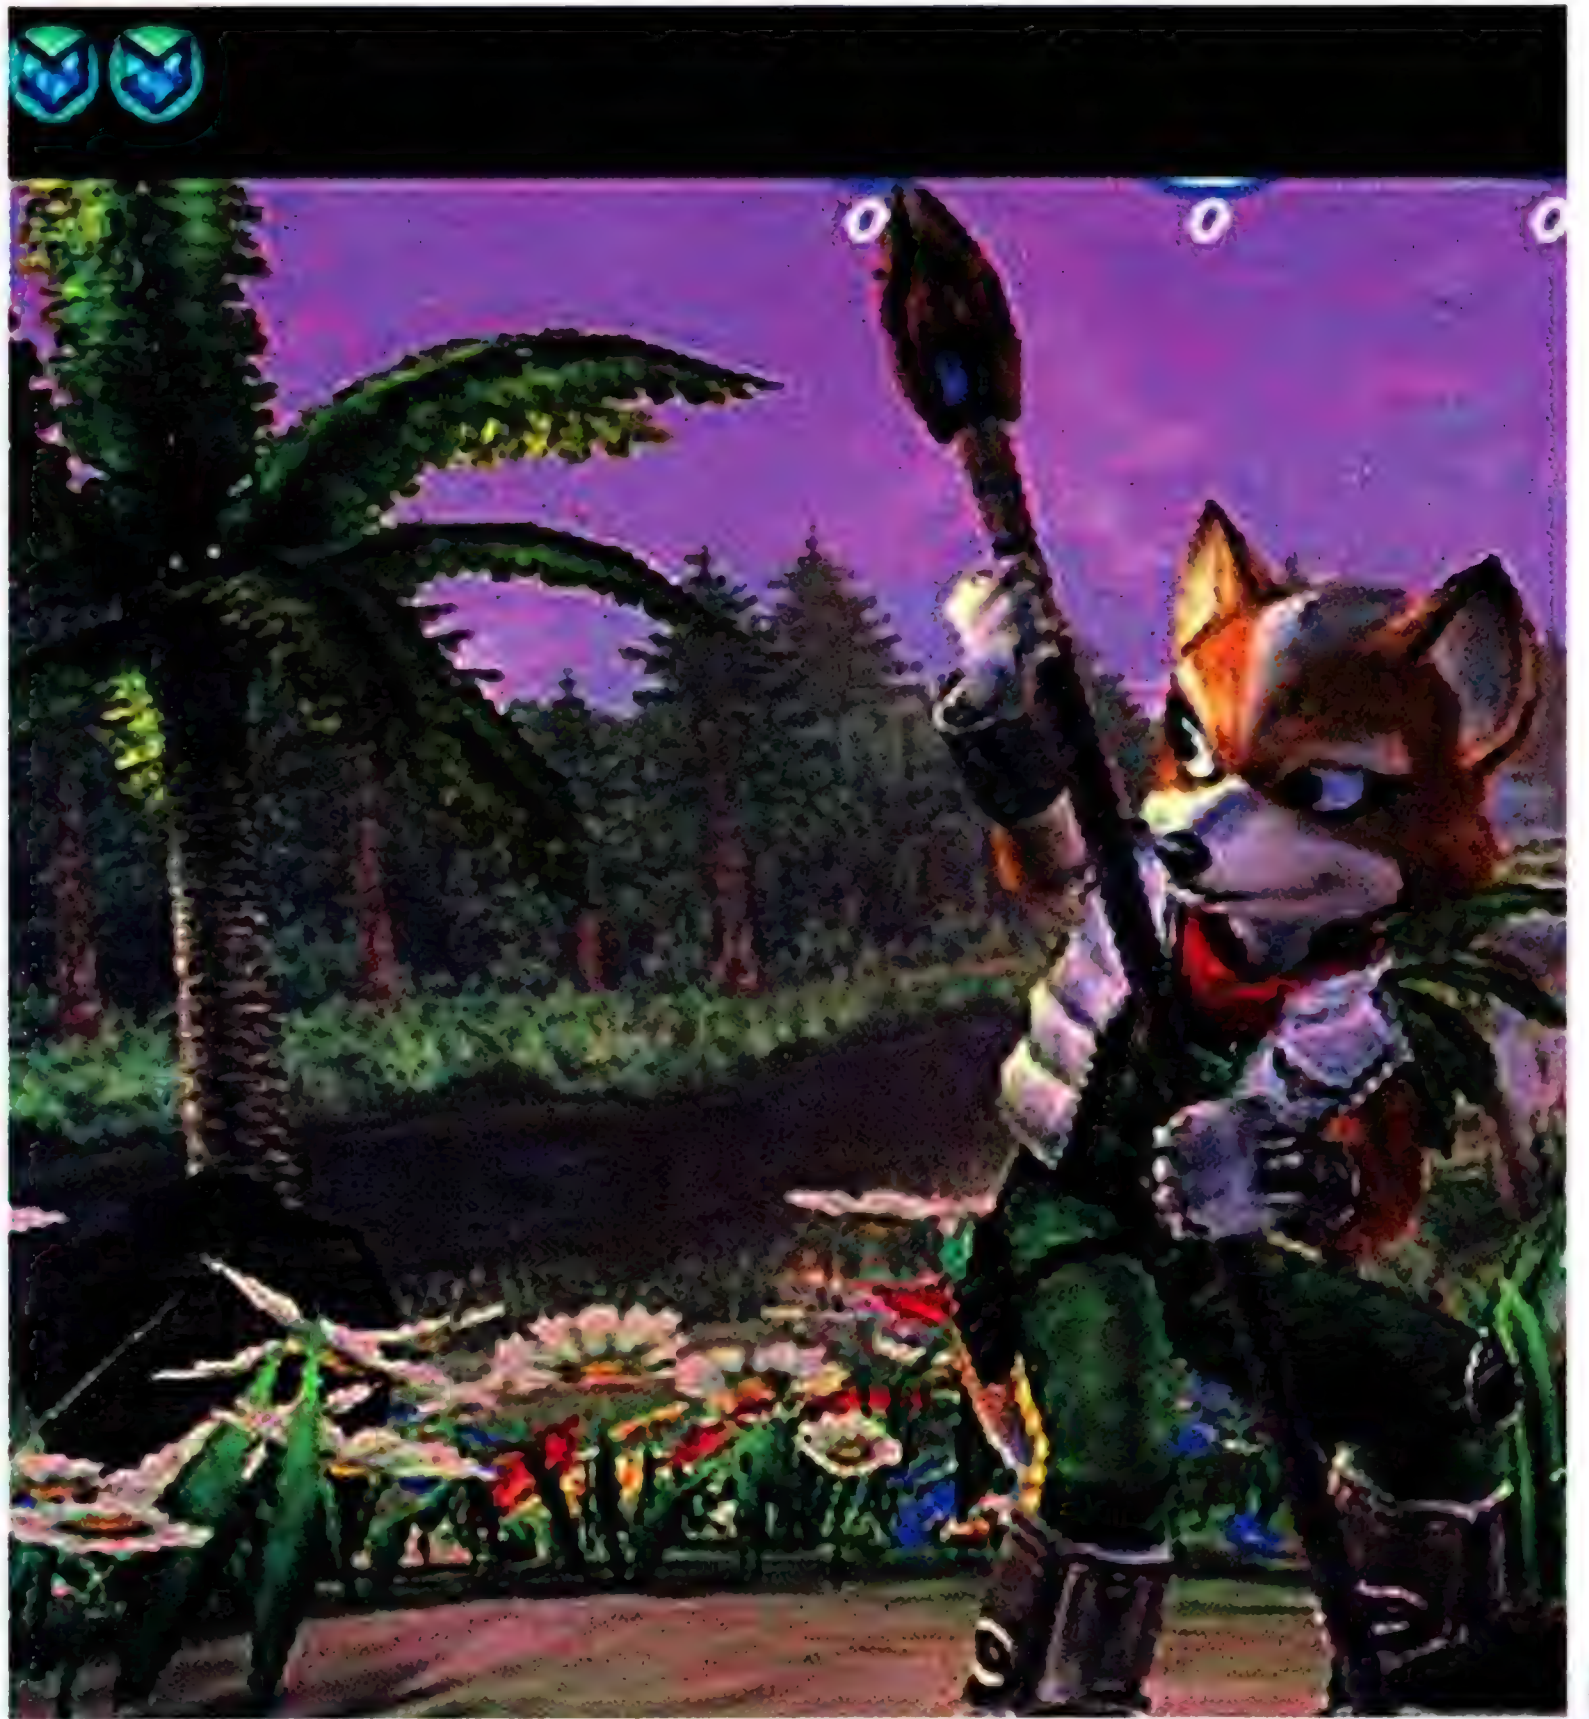

GAMECUBE TOP 10

STAR FOX ADVENTURES: DINOSAUR PLANET

Nintendo - November 5, 2002 - \$49.99

In development for two years as an N64 game, hopefully Star Fox Adventures goes the route of *Eternal Darkness*, another game which was re-routed and eventually launched to rave reviews on the GameCube. Steer Fox McCloud through some interplanetary hijinx using *Zelda*-like controls. Pals like Slippy and Peppy are back to help with weapon upgrades and mission objectives in what should be an excellent adventure.

HOLIDAY BUYER'S GUIDE

RESIDENT EVIL 0

Capcom - November 5, 2002 - \$49.99

A prequel-sequel designed to take players back to pre-RE1 days, Resident Evil 0 is going to be hard-pressed to outdo the recent GameCube remake of the original RE classic. Still, anyone with a passing knowledge of Chris, Jill, and the rest of the STARS (Special Tactics And Rescue Squad) gang will want to check this out. A new partner-zapping mechanic has you simultaneously protecting the lives of both lead characters in this bone-chilling nightmare. We love it.

ANIMAL CROSSING

Nintendo - September 16, 2002 - \$49.99

Unique, quirky, eccentric and just plain odd are a few of the words that come to mind when describing Animal Crossing. There's no real goal here—no end to the means. Live life as you see fit in a world that looks like something out of a PaRappa the Rapper game. Attend holiday functions, take your character over to a bud's village via memory card or just download classic NES games for your GBA.

GAMECUBE TOP 10

SUPER MONKEY BALL 2

Sega - February 26, 2002 - \$49.99

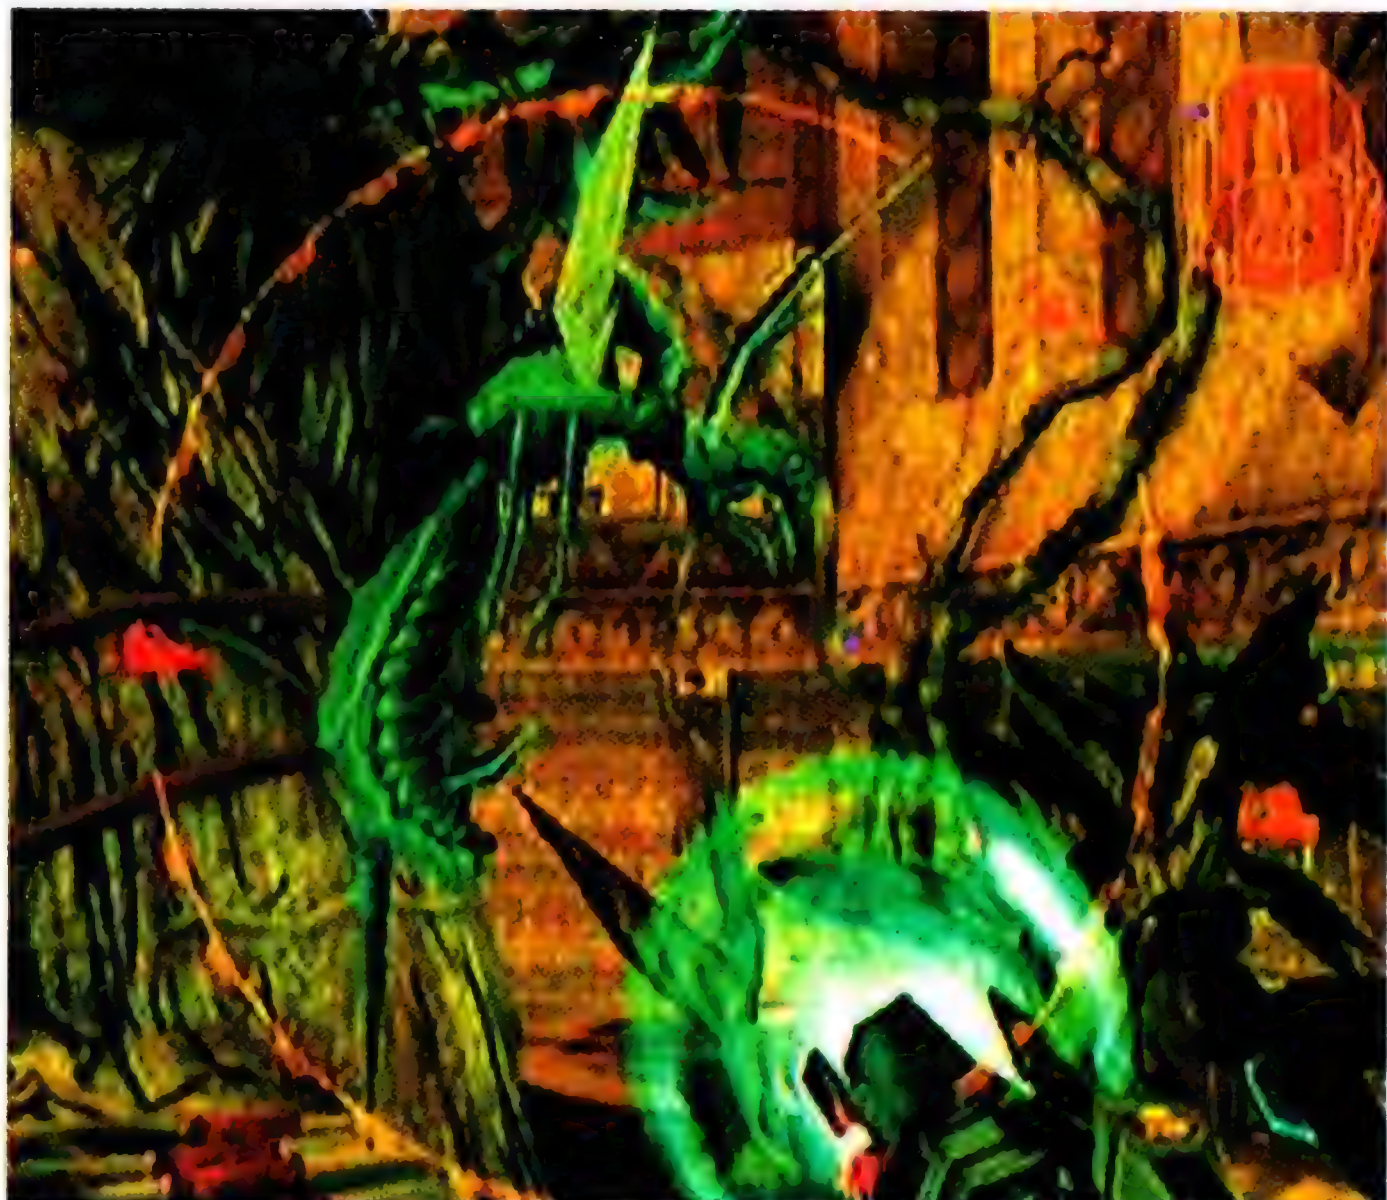

Sega had one of the surprise hits of GameCube's launch last fall with the release of Super Monkey Ball. Basically a super-cool collection of minigames wrapped around an updated version of what is essentially Marble Madness, SMB is bursting with old-school fun. Dive in for five minutes or five hours, and the more friends you have over the better.

METROID PRIME

Nintendo - November 18, 2002 - \$49.99

Stemming from what many gamers consider the greatest game series of all time, Metroid Prime gets its next-gen facelift this fall. The overhaul to the Cube hasn't been smooth, but our most recent outing with the game has us drooling at Metroid's 3D goodness. It's pretty much a first-person-shooter, but retains some of Metroid's classic elements such as rolling into a ball, using the grapple hook and so on. This one's destined for greatness.

MARIO SUNSHINE

Nintendo - August 26, 2002 - \$49.99

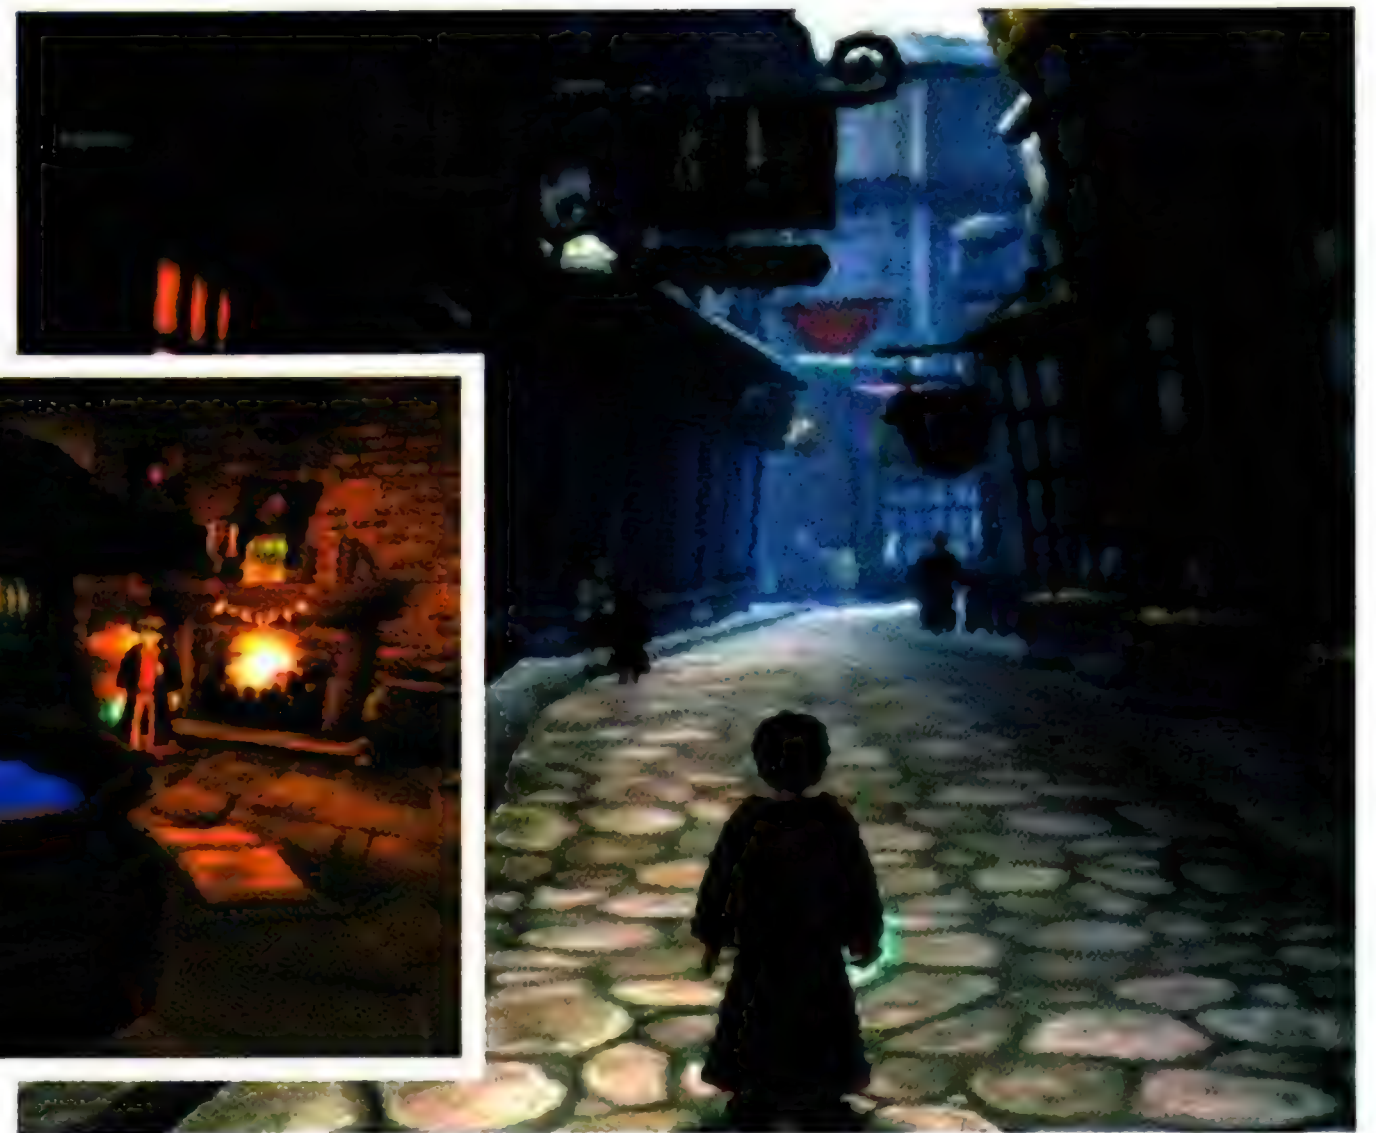

Everyone's favorite plumber is back, sporting an all-new water-spurting backpack and plenty of other goodies. Six years is a long time between games, but Mario Sunshine doesn't disappoint. The new water backpack is part fun, part problem solving, part jet-pack transportation, and all good. We had a blast just putting that thing through its paces. Throw in some lavishly appointed worlds and Nintendo charm and you're looking at a winner.

HARRY POTTER AND THE CHAMBER OF SECRETS

EA - November 5, 2002 - \$49.99

Despite last year's decidedly average Sorcerer's Stone game (for PSone only), we're excited about the prospects for the Chamber of Secrets. First off, the plot of the second movie makes for better game material. There's more action and plenty of over-the-top scenes that EA can take right from the movie. Look for some Zelda 64-inspired gameplay and stunning visuals to be the icing on the cake.

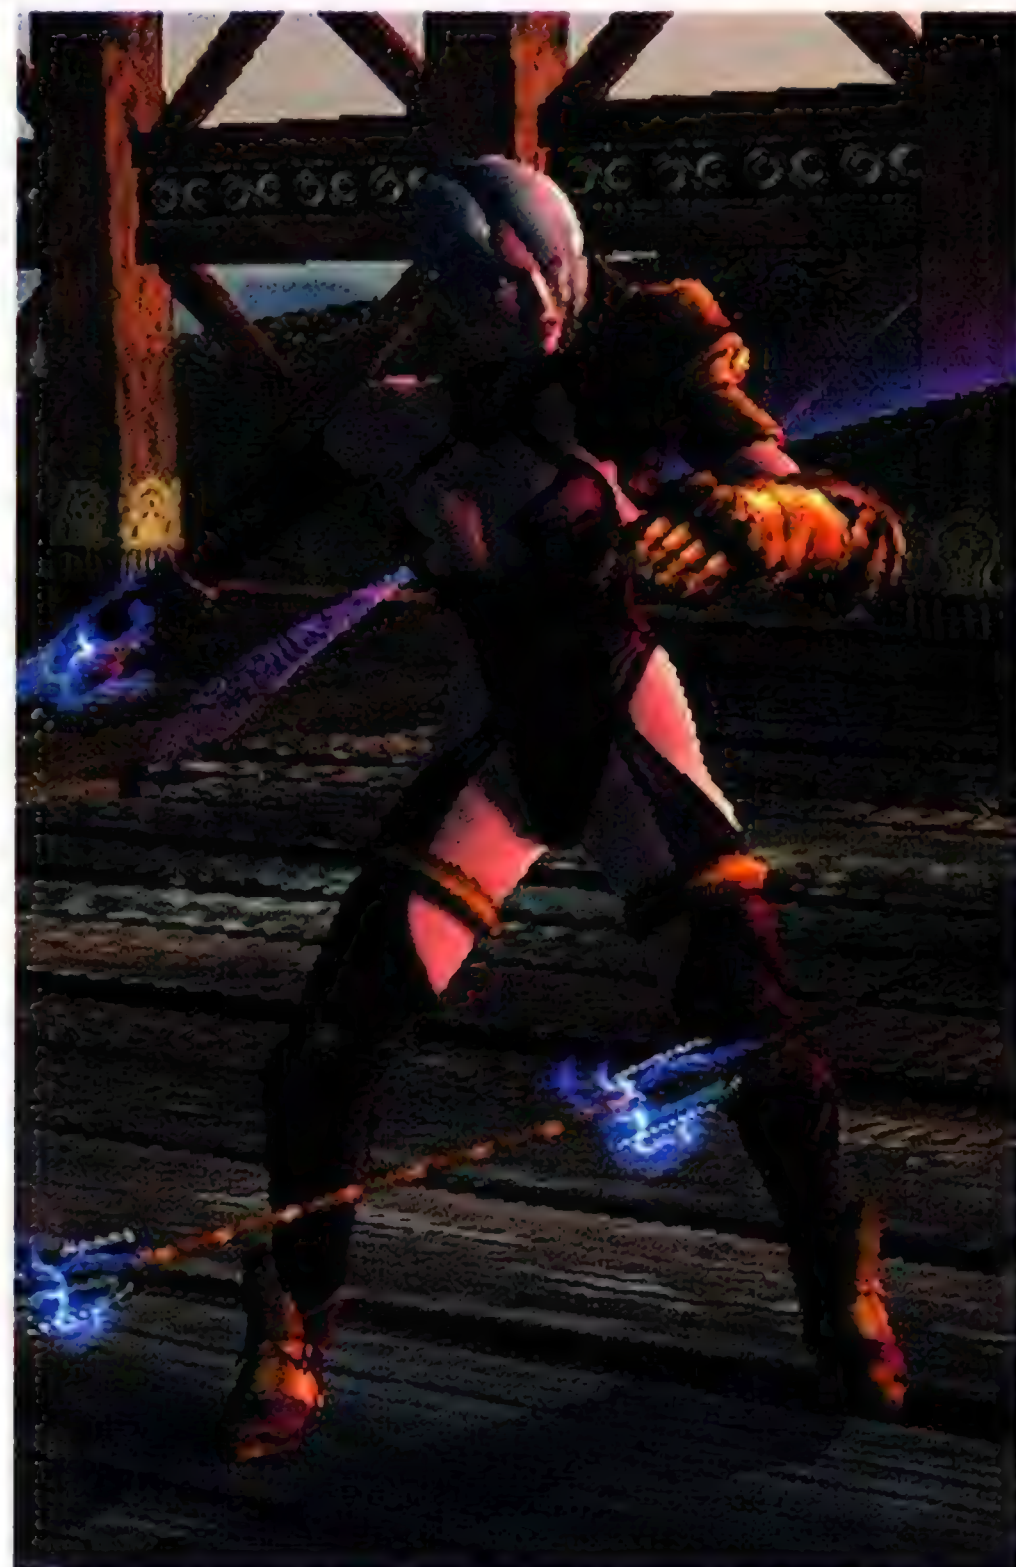

GAMECUBE TOP 10

SOUL CALIBUR 2

Namco - TBA, 2002 - \$49.99

One of the most revered fighting games of all time, Soul Calibur made its big splash during the Dreamcast's 1999 launch. Still one of the prettiest games around, "Soul Cally" (as we like to call it) sports full-on 3D weapons-based combat. Characters have plenty of unique attacks, range moves, throws and defensive maneuvers, making for a real game of cat-and-mouse. You can button-mash if you like, but the real joy here is in mastering a certain character.

PHANTASY STAR ONLINE EPISODE I AND II

Sega - October 29, 2002 - \$49.99

PSO's not quite on the scale of EverQuest (Sony's massive online PC game), but it's console base is rapidly expanding. PSO is the first online game for the Cube, and fans worldwide will be hopping onto servers come Oct. 29. New character classes, weapons, items, quests and enemies are just the beginning of a whole new journey. Chat, join friends and explore PSO's techno-chic universe together. There's not enough hours in the day for a PSO fan.

HOLIDAY BUYER'S GUIDE

GBA TOP 5

Take your favorite games—such as *Super Mario World*, *Castlevania* and *Sonic the Hedgehog*—make them portable, and sell them for under \$35. This is what makes the Game Boy Advance so scrumptious. We've played all of the games due out through the end of the year, just so we can bring you VGU's Top Five GBA Games For 2002:

THE LEGEND OF ZELDA: A LINK TO THE PAST

Nintendo - December 9, 2002 - \$29.99

A Link to the Past is an action role-playing game set in the land of Hyrule. Hyrule is a massive and beautiful place—so much so that you'll spend more time sightseeing than you will worrying about the dozens of monsters, countless puzzles and 14 different bosses that lay in wait. Also included is *The Four Swords*, a multiplayer game where up to four people compete to see who can gather the most rupees.

SUPER MARIO WORLD: SUPER MARIO ADVANCE 2

Nintendo - February 10, 2002 - \$29.99

Take our advice: Get *Super Mario World*. It is a fun and diverse platform adventure that will entertain you for hours. Mario and Luigi don't just run and jump their way through 96 different levels—they float, swim and ride atop hungry Yoshis, as well as battle their way past eight massive Koopa bosses.

CASTLEVANIA: HARMONY OF DISSONANCE

Konami - September 04, 2002 - \$34.99

In all things visual, auditory and gameplay, *Harmony of Dissonance* kicks serious ass. You'll explore more than 100 rooms in two different castles, as well as encounter hundreds of monstrous foes, some of which are four times larger than the actual screen. A "spell-fusion" system lets you combine books and items into dozens of different attacks, and there are plenty of RPG-style power-ups to augment your strength, stamina and magic characteristics.

YOSHI'S ISLAND: SUPER MARIO ADVANCE 3

Nintendo - September 30, 2002 - \$29.99

Yoshi's Island is a prequel to *Super Mario World*. Players assume the role of Yoshi, who has to return Baby Mario to his home. There is plenty of platform jumping and monster smashing spread throughout the game's 60 levels, but it is Yoshi's ability to transform into a number of cool vehicles—such as a submarine and helicopter—that ultimately delivers a fun experience.

METROID FUSION

Nintendo - November 18, 2002 - \$29.99

GameCube owners aren't the only lucky ones this November. *Metroid Fusion* once again brings Samus to SR388, the home planet of the Metroid life-form. Samus will battle hundreds of alien creatures in search of a vaccine that only a Metroid can produce—in order to rid herself of the parasitic "X" that now infects her body. New additions to the classic formula include wall climbing and the ability to absorb enemy life energy.

HONORABLE MENTIONS — *Contra Advance* (Konami, Nov. 2002), *Sonic Advance* (THQ/Sega, Feb. 2002),

Tactics Ogre (Atlus, April 2002), *Tony Hawk's Pro Skater 3* (Activision, March 2002), *Street Fighter Alpha 3* (Capcom, Sept. 2002).

PC GAMES TOP 5

There have been many reports over the last few years that PC games were dead. Every time a new console is released, the difference in power is narrowed and those who don't care to play their games on a machine with a keyboard decry the future of the medium. The lack of innovative titles in 2001 didn't really help matters, but wait, don't count the PC out yet. Lately we have seen the release of many amazing PC titles, with a bunch more in the wings.

There are those who will ask why bother when they already have a perfectly good console sitting on their TV set. Well, below there are five good reasons. The latest and greatest PC games for 2002. The only requirement to make the list is the title had to appear on the PC first with no console version available this year (sorry *Elder Scrolls: Morrowind*). You will find most genres represented on this list, and unless there are any unpleasant, late-in-development surprises, they all look to be A+ games. So sit back, grab your mouse, and give these picks a whirl.

THE SIMS ONLINE

Release: November 18, 2002 • **Publisher:** Electronic Arts • **Developer:** Maxis

The Sims Online will allow fans of the series to customize a character and house to their liking and interact with others in the neighborhood. Live your life the way you want to, while interacting with other virtual people being controlled by other real people trying to escape the real world, just like you! If this sounds silly to you, then you most likely aren't a fan of the series in the first place. If this sounds like heaven, nothing we could write would discourage you from giving it a try.

WARCRAFT III: REIGN OF CHAOS

Release: Now • **Publisher:** Blizzard Entertainment • **Developer:** Blizzard Entertainment

It wasn't the first real-time strategy game released, but it was one of the most popular. The *Warcraft* series of games, especially *Warcraft II*, brought RTS into the fantasy genre. The battle between the Orcs and the Humans has expanded, with two new races and a new 3D engine to spiff things up, a first for an RTS. Add in the requisite scenario editor and you have the perfect RTS package.

STAR WARS GALAXIES: AN EMPIRE DIVIDED

Release: December 5, 2002 • **Publisher:** LucasArts • **Developer:** Verant Int./Sony OE

If you follow the online game scene at all, you probably know that *Everquest* is the number-one MMORPG (Massively Multiplayer Online Role Playing Game for the uninitiated). So when LucasArts decided to bring the most popular science-fiction franchise of all time online, they turned to the crew at Verant and Sony Online Entertainment to fulfill their ambitious goals. The result is *Star Wars Galaxies*, and it is sure to please Star Wars and RPG fans alike.

COUNTERSTRIKE: CONDITION ZERO

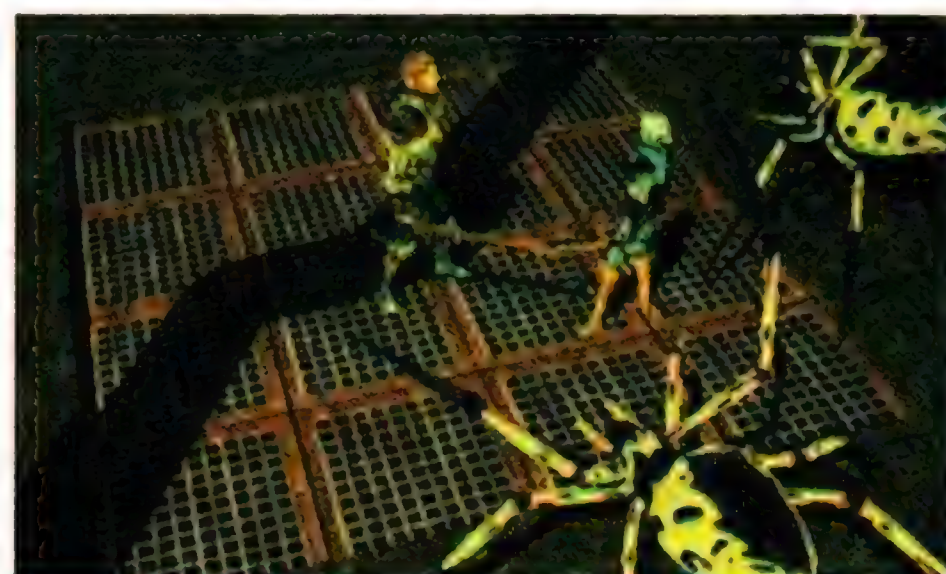

Release: October 14, 2002 • **Publisher:** Sierra/Valve • **Developer:** Gearbox Software/Valve

Half Life revolutionized the first-person shooter genre by providing a rich story (usually associated with adventure and role-playing games), and by giving mod makers the opportunity to create some of the finest "amateur" game expansions ever. One of these mods, *Counterstrike*, turned out to be so popular that it was eventually released commercially as a multiplayer game. *Counterstrike: Condition Zero* will offer more than 20 new missions all playable in single-player mode (something the original lacked).

NEVERWINTER NIGHTS

Release: Out • **Publisher:** Infogrames • **Developer:** Bioware

Those who equate Dungeons and Dragons with sitting around a card table, staving off sleep with Mountain Dew and Twinkies will find themselves in need of this computer game (especially if the old gang has scattered to the four winds and you need a method to get together again). Incorporating the third set D&D rules, NWN is poised as a launch-pad for an entire movement in gaming. Once some of the user-created mods start appearing, this game is really going to show its power.

"Sonya is back and she's gonna kick some Mortal butt—my kinda gal!"

MORTAL KOMBAT: DEADLY ALLIANCE

DEVELOPER: MIDWAY

PUBLISHER: MIDWAY

PLATFORM: PS2, XBOX, GAMECUBE

RELEASE DATE: WINTER 2002

ALTHOUGH titles like Virtua Fighter 4 and Soul Calibur are the current rage, a staple of the fighting genre has been quietly undergoing a transformation. The series that put Joseph Liebermann in the crosshairs of gamers everywhere is back in full 3D and landing on the PS2, GameCube and Xbox this winter. The question is: Will it be able to compete?

For starters, the Mortal Kombat fighting system has been completely rebuilt. Characters now have multiple attack styles that can be changed in the middle of a match. Press a button and watch as your fighter switches to techniques based on such arts as Tae Kwon Do, Kama or Sai in the center of the ring.

Graphically, Midway is using the power of the three consoles to generate details like ripped clothing, bruises, as well as dripping sweat and blood. Not surprisingly, new Fatalities will also be a part of the mix.

Returning characters include Scorpion, Sub-Zero, Raiden, Jax, Sonya, Reptile, Cyrax, Shang Tsung, Johnny Kage, Kitana, Quan Chi, Kung Lao and Kano. New to the series are Malvado, who appears to be straight out of a classic vampire flick; Moloch, a large troll-type creature; Blind Kenshi (*He prefers the term "visually impaired" – Ed*), Drahhmin, a skinless, mask-wearing fighter; a yet-unknown female character named Li Mei, and Frost, a female Sub-Zero. There are also rumors of an unnamed drunken Kung Fu stylist.

While the version we played at E3 was lacking the special moves that make the game what it is (Scorpion's Hook, Sub-Zero's Ice Blast), it still succeeded on a basic, 3D fighting level. Whether or not MK: Deadly Alliance will have the depth of titles like Soul Calibur remains to be seen, but in the gaming industry, franchise loyalty is high. A few tweaks here and there, some new special moves and quality fatalities are all this title needs to leap to the head of the pack and back onto CNN.

"Murder is not my gig,
but Hitman 2 isn't as
dumb as MGS2."

HITMAN 2: SILENT ASSASSIN

DEVELOPER: 10 INTERACTIVE

PUBLISHER: EIDOS

PLATFORM: PS2, XBOX

RELEASE DATE: NOW

HEADING to the PS2 and the Xbox is the sequel to Eidos's Hitman title. Players control the anonymous assassin Agent 47, forced back into a life previously abandoned where all that matters is a back to the wall, a good vantage point and a quick trigger finger. Not surprisingly, Ex-KGB, international terrorists and Sicilian mafia are running rampant and need to be rubbed out. (*If your parents complain about you playing this game, tell them you're doing the world a favor—Ed.*)

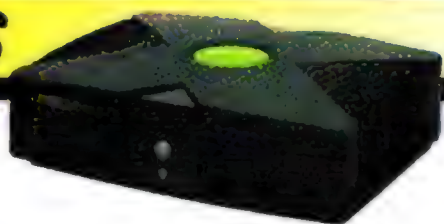

Eidos claims that Silent Assassin is a mix of action, stealth and sniping, where your abilities and proficiency as a killer are measured on a balance between stealth and aggression. It's possible to sneak through a level killing only the primary target—but players who prefer a straight fight to sneaking around

can opt to blast everything and everyone in sight. Unlike other games of this nature, Eidos promises that there is no set pathway through a level.

Because of the diversity of missions, a large selection of weapons is only natural. Using a PSG to send a bullet tearing through the heart of an ex-covert op might be necessary in one level, but impossible in another. Accordingly, players have katanas, knives, handguns, explosives, chloroform, poison darts, stun guns, night-vision goggles, lockpicks and laser-sight technology. And, unlike the original, Agent 47 will be able to keep items he has acquired from mission to mission.

Players will do some serious globetrotting in this title, stalking and killing prey in such exotic locales as Sicily, St. Petersburg, Japan, Malaysia and India. Aside from having stellar visuals, the game features a musical score by Jesper Kyd (Messiah, MDK2) which was performed by the Budapest Symphony Orchestra.

"Grab two guns and you've got yourself a zombie-blasting bloodfest. Now this is what good games are all about!"

HOUSE OF DEAD 3

DEVELOPER: WOW ENTERTAINMENT

PUBLISHER: SEGA

PLATFORM: XBOX

RELEASE DATE: FALL

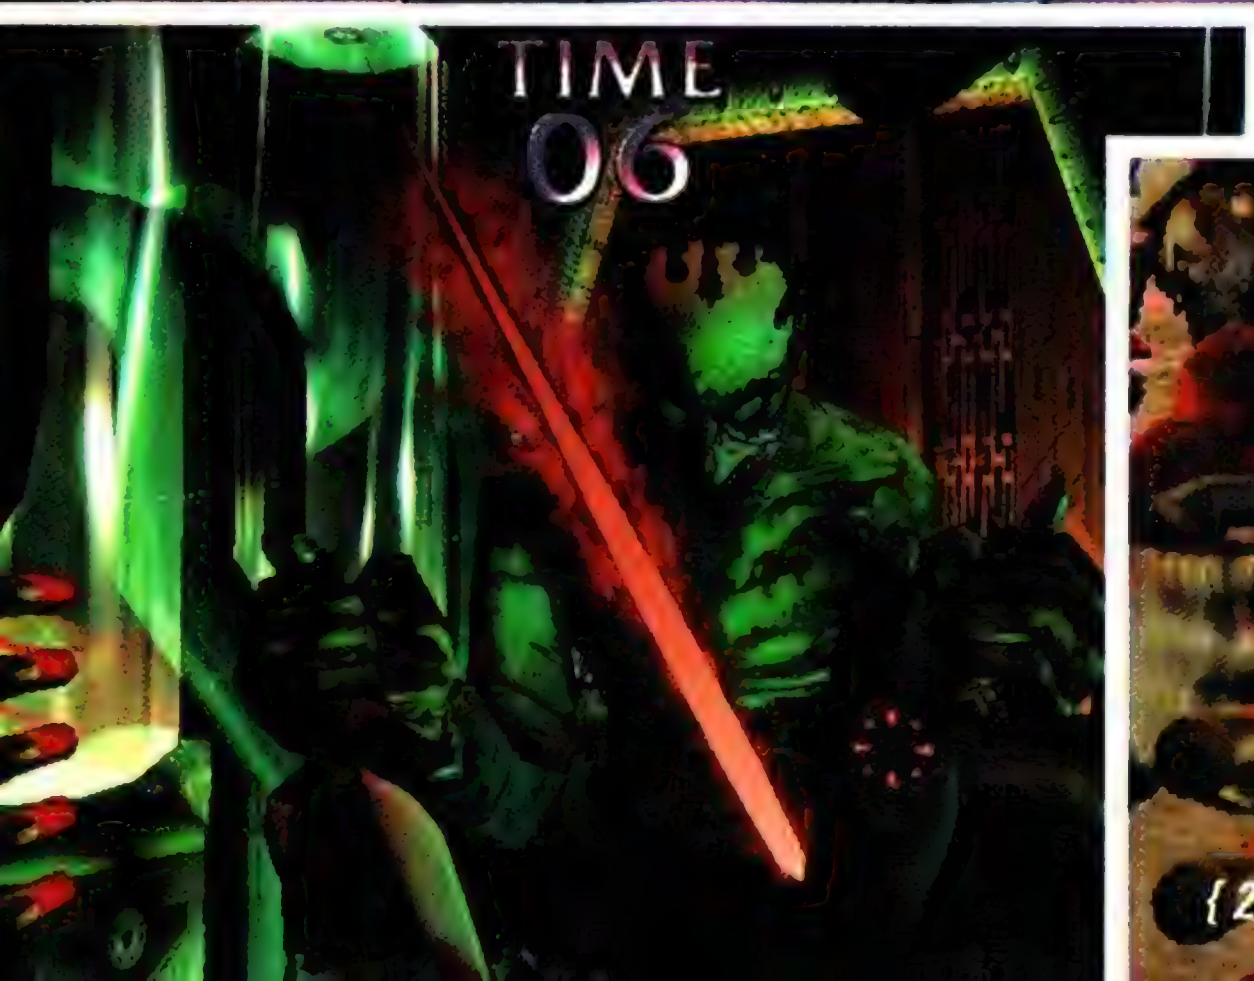

APPARENTLY gamers just can't get enough of dismembering zombies and other demonic foes via mass amounts of lead as Sega's House of the Dead franchise returns for a third installment late this year. Like the past games, there's a simple B-movie "plot" involving the rescue of scientists who have been experimenting with such staples of evil as succubi, gargantuan spiders and Pauly Shore.

The "railway cart progression" used to explore levels found

in the earlier titles will change depending who players save, what they shoot, and what they don't. While House of the Dead 3 remains essentially the same as the first two titles, the traditional pistol has been replaced by a shotgun, allowing for players to wipe out hordes of enemies with a single blast.

Sega has also altered the gameplay slightly by making time a factor: Even if you can bulls-eye Wamprats in Beggar's Canyon back home, if it takes you 20 seconds to do it, you'll become zombie fodder. We here at *VGU* are looking forward to this title (especially Zitowski, who, as a boy, tortured cats and lit things on fire).

Take a look at the shots (no pun intended) we've gathered, and see if you agree that Sega has created "beautifully rendered gore." (*Gotta love their PR reps—Ed.*)

"After seeing the environments in this game, I think Argonaut stole the Cheshire Cat's hookah...."

MALICE

DEVELOPER: ARGONAUT GAMES

PUBLISHER: SIERRA ENTERTAINMENT

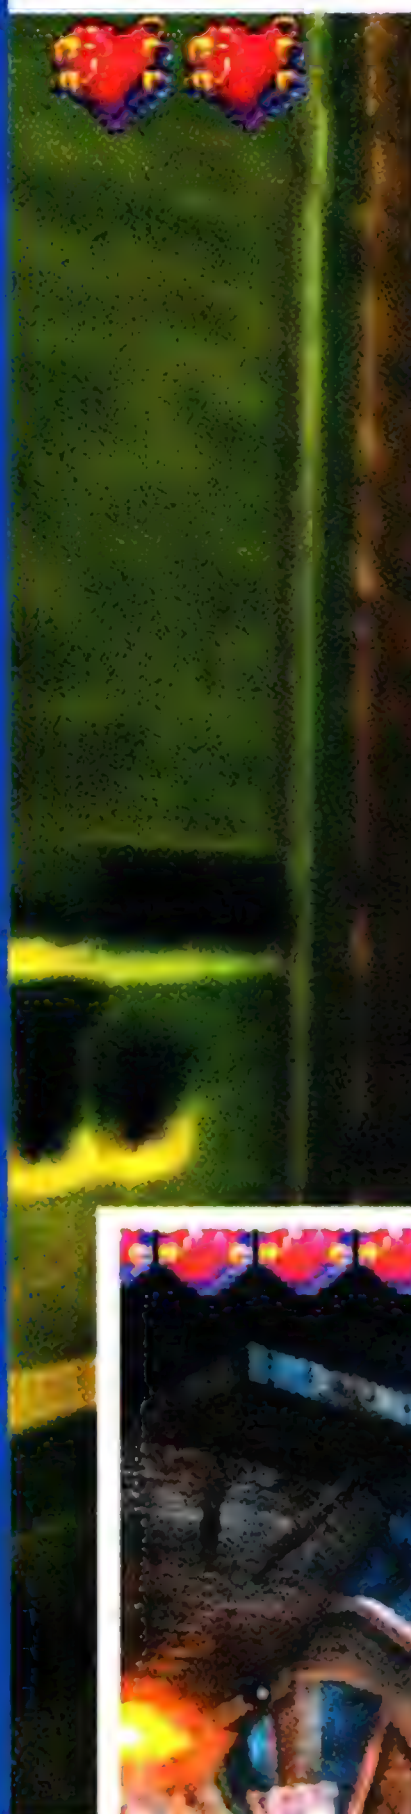

PLATFORM: PS2, XBOX

RELEASE DATE: NOVEMBER

It's hammer time....

There's no doubt that Sierra's upcoming platformer is going to turn some heads. Following Theodore Roosevelt's famous adage, "Walk softly but carry a big stick," Malice is about a cute redhead who marches through beautiful 3D realms armed with a giant clockwork hammer. A kind of Pippy Longstocking out to kill, Malice accidentally releases an unspeakable evil upon the world and decides she needs to clean up after herself. Gameplay is run/jump/crush-kill-destroy fare, but the graphics are what make Malice stand out from the rest of the current crop of platformers.

Loosely based on the bizarre environments from the classic tale *Alice In Wonderland*, Argonaut has put its protagonist down a digital rabbit hole and come up with haunted libraries, prison yards and stunningly beautiful forests. Malice herself is going to be voiced by Gwen Stefani, with her bandmates supplying incidental voices. With over 20 levels to explore and dozens of villains to pound, Sierra President Mike Ryder has declared that Malice will be "one of Sierra's leading franchises in the years to come." We just wanna fight like a girl.

"It's button-mashing, butt-kicking time!"

TEKKEN 4

DEVELOPER: NAMCO
PUBLISHER: NAMCO
PLATFORM: PS2
RELEASE DATE: NOW

TEKKEN 4 is what Tekken Tag Tournament promised to be: the new Tekken.

Arenas are multi-leveled and full of interactive objects, such as walls, glass doors, statues and puddles. You can slip on puddles, so be careful while performing those flashy kicks.

New moves include sidestepping with a single push of the analog stick, single-button reversals and custom combinations

that don't require a notepad to memorize. Namco has also added a number of "knockdown recovery" moves for those of us who fight from the pavement.

New characters include Christie Montiero, a female Capoeira expert; Steve Fox, a boxer from Britain; and Violet, a purple dye job of former mobster Lee Chaolan. In all, there are 20 playable characters—15 from former Tekken games and five newcomers.

Tekken 4 features the same single-player, training, team battle and Tekken Force modes from the previous two games. New modes include...OK, there are no new modes. Ah, well, it's mostly new.

"My favorite part in this game is picking out the clothing in create-a-skater"

TONY HAWK'S PRO SKATER 4

DEVELOPER: NEVERSOFT
PUBLISHER: ACTIVISION
PLATFORM: PS2, XBOX, GAMECUBE
RELEASE DATE: NOVEMBER

ALTHOUGH barely a year has passed since the last installment, Activision wants you to plunk down some phat cash for Tony Hawk's Pro Skater 4. This new addition to the franchise includes 10 new levels, 18 skaters, an online mode (for PS2 and Xbox) and more than 50 signature tricks—but that's not why you should be interested.

Tony Hawk's Pro Skater 4 is fresh and free. Free-

roaming that is. All of the included parks feel like they're ripped from pre-existing landmarks and not just some manufactured fake-o skate-park. In the zoo level, for example, you have to dodge sniffing kids with balloons while scooping out elusive grinds and ramps near the animal cages—with wild animals inside.

Goals in the Career mode are much more friendly, too. Instead of that lame clock always ticking away, pedestrians assign challenges and award points based on skill and style. Some of these challenges can completely transform the level you're skating in, which makes THPS4 a lot livelier than previous installments.

COVER STORY

HEAVY

ROBOTECH BATTLECRY

**SEES ANIME TAKE AMERICA
BY STORM**

BY SCOTT STEINBERG

METAL GEAR

THE FUTURE IS NOW.

A colorful philosophy, yet one TDK Mediactive happily espouses as they bring the future of mechanized combat crashing onto GameCube, PlayStation 2 and Xbox this fall. As not only the first major next-generation mecha-themed product, but also the one true realization of a treasured franchise now more than 15 years old, *Robotech: Battlecry* represents the freshest evolution of urban warfare, and perhaps even anime, as we know it. A third-person action game that'll appeal to everyone from hardcore gamers to closet otaku, it's an absolute must-have title. Why? The game's almost sure to blow up faster than an attacking Destroid once you hit the scene.

ARCHRIVALS

Meet Jack Archer, ace fighter pilot. He's a new, yet wholly inventive character created specifically for a new storyline that parallels the first chapter of the Macross saga. Not to mention your alter ego. Well and good, that is, except for one small detail—all hell's about to break loose when the Zentraedi, a hostile alien race, invade Earth. Any guesses as to who'll be leading the charge for the Robotech Defense Force against said aggressors? In typical fashion, it's a tale of soap opera-esque proportions, combining themes of romance and conflict with cameo appearances by recognizable characters.

Guaranteed to make an appearance: Roy Fokker, the man who recruited our hero. Also on that list: Lynn Minmei, Rick Hunter and Lisa Hayes. But new stars will also shine, including Hiro Ishii, Archer's buddy and talented Destroid pilot; Chase Hansen, an apparent superior officer; and Izzy, the spunky wing-woman who'll guard one's back throughout a significant portion of the tale. Never-before-seen baddies also hog the spotlight—among them Zerall, Gorian and Kiora, a female Zentraedi flier obsessed with offing the protagonist. Naturally, developer Vicious Cycle has taken every step necessary to ensure the underlying framework mimics the franchise that inspired it.

"Robotech introduced anime to North America," says producer Carlos Rodriguez. "Our goal is to bring this brand back into the public's imagination." Therefore one can "expect to see almost every familiar vehicle here alongside the voices of seven original actors from the series.... We want to give fans what they've been waiting for the last 15 years."

DEMOLITION MAN

As for just what such a game would be, picture an incredibly frenetic shoot-'em-up supplemented by highly stylized cel-shaded visuals and a knack for gameplay variety and pyrotechnic flair. Before each mission—of which a likely 35 will be available, divided into chapters—you'll select a Veritech fighter (half-plane, half 40-foot-tall robot) with which to rend rival mechs by the dozen. To its credit, the game lets you choose from a sizable selection, including Sumo and Super models, with each featuring varying armor/weapon readouts. While the choice is made largely for cosmetic reasons, it's a nod toward replayability one can't knock.

Once the scene shifts to a ravaged cityscape or a high-altitude horizon, nothing short of pure carnage ensues. Strafing, boosting and auto-targeting your way around the large-scale environments, aspiring do-gooders pepper hostile forces with machine-gun bursts, missile volleys (complete with obligatory smoke trails), sniper fire and any other special ability that comes

to hand. Designed for fluidity, you'll find play quite breezy, as you circle prey or run jagged patterns in the air while reigning death upon adversaries from above. Just watch your aim—errant, or perhaps not so misplaced, shots can cause entire buildings to tumble down in a staggering display of animated violence that ends in a puff of watercolored smoke.

Explains Rodriguez, "I do not call Robotech: Battlecry a giant robot sim. It's a third-person action game. Giant robot sims are usually slow-paced. They tend to have more in common with military tank simulations than action games. We've set out to make a fast, fun title that does the license justice."

Indeed, TDK's chosen few have seemingly done just that. Stomping enemies into submission as a bipedal man-made monster or jetfighter is a theme that works well across a diverse solo campaign. With goals ranging from search-and-destroy affairs to holding key strategic positions down or performing escort assignments, tapping into the Veritech's myriad capabilities is a must, too. It's on a positive note, then, that we can say even at a preproduction stage, the handling, controls and play balancing for all modes are coming together splendidly.

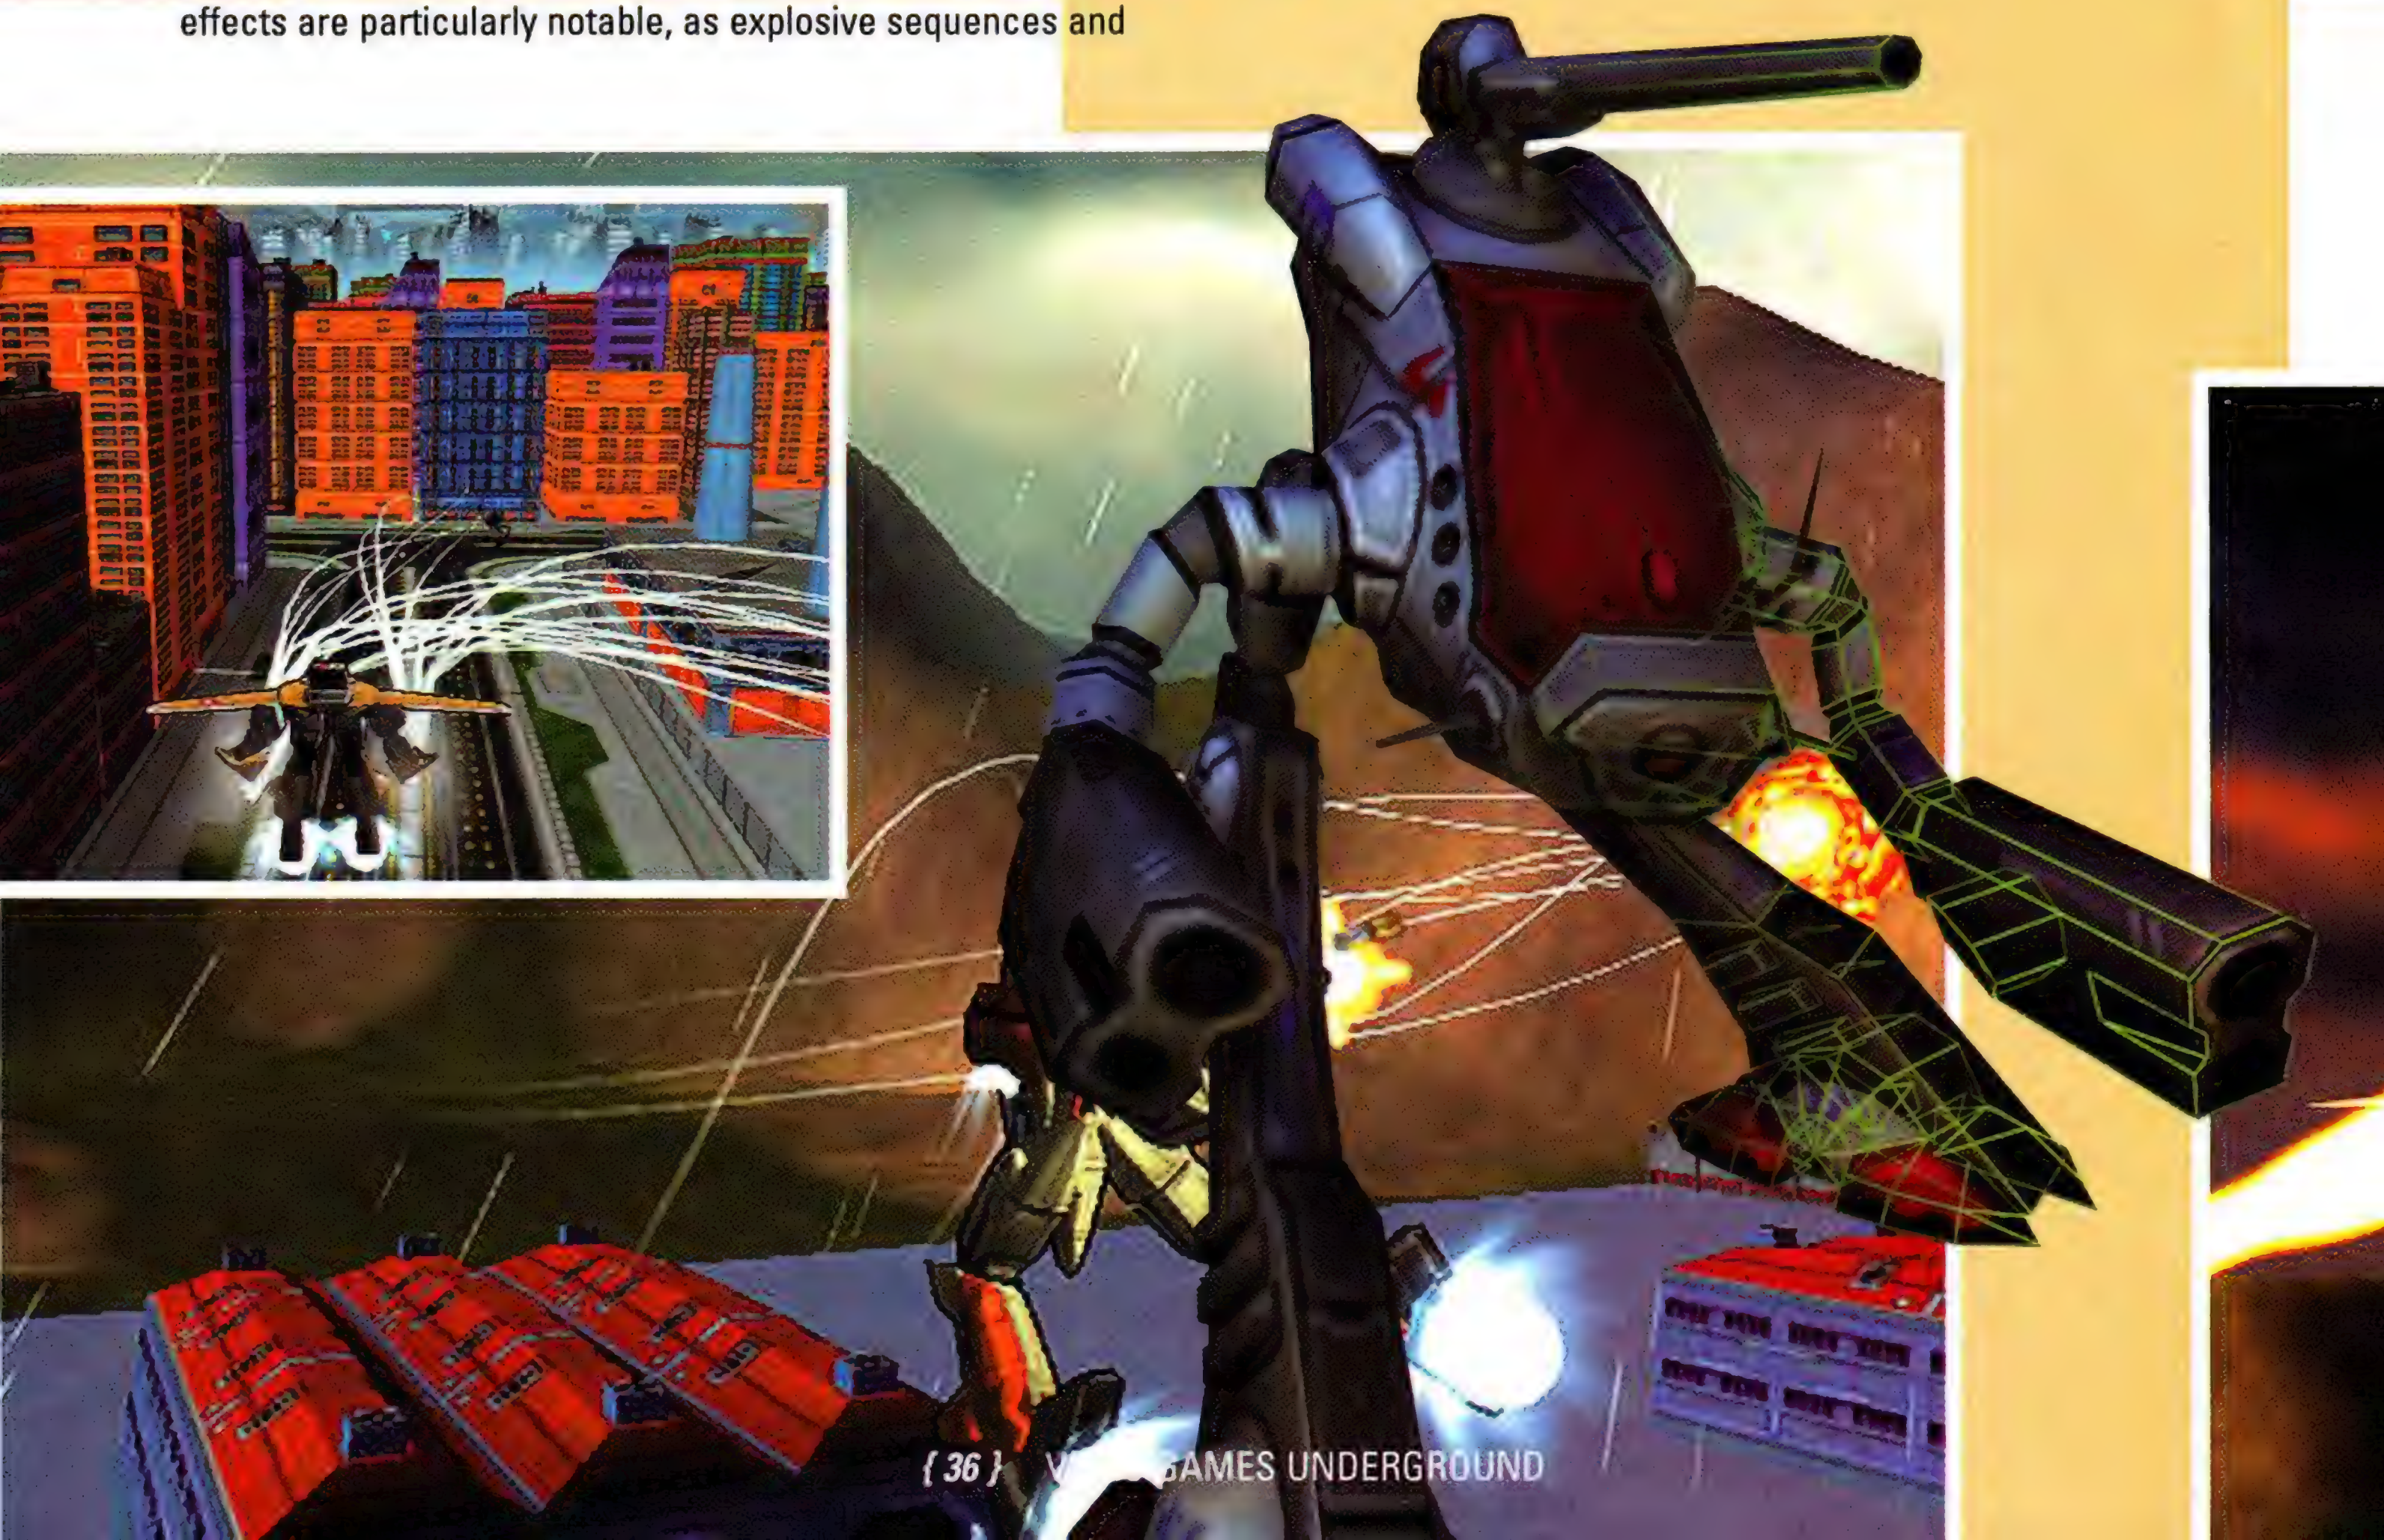

COLOR ME BAD

The same can be said for the visuals as well. Crisp and vibrant, animated models, textures and props all look fabulous, sporting a distinct look in keeping with the series' roots. Special effects are particularly notable, as explosive sequences and

visible mech damage are sights to behold, with combat incredibly visceral as a result. Soaring through the clouds as a shining sun radiates lens flare or tromping atop an elevated urban byway while the tattered remains of what was once a residential complex rise in the distance leaves a lasting impression. This is, without question, a beautiful game.

"The majority of the people working on the project are fans," admits Rodriguez. "We've also worked closely with Mattel and Harmony Gold to ensure the accuracy of our art and technology." Hence the developer's ability to capture the essence of what made Robotech such a memorable franchise. Well, that and the fact Rodriguez "used to run home from school to watch and tape Robotech when it premiered 15 years ago, and since then [has] seen hundreds of anime films, good and bad."

Whether these experiences will bleed over into the title's development we can only hope, but so far, all signs are a go. It's already apparent that anime fans hankering for a hunka highly proficient giant-robot combat need look no further than Robotech: Battlecry. Besides, at the bare minimum, for destructive hits and giggles, it can't be topped. Laughs Rodriguez, "There's a definite 'cool factor' involved in the idea of a 40-foot-tall robot that changes into a jetfighter. Things like that and Godzilla tend to cause serious damage whether they want to or not." And with you at the helm? Get ready to scrap the "or not" part.

You want boss strategies? They're in here, too, and we tell you how to finish the job the right way. So suit up, partner. It's time to nab some bad guys.

By Mark Manzo

CHAPTER 1 LAST CALL

Mission Breakdown: Tutorial

Suggested Weapons: N/A

Tips:

1. Walk up the fallen crane to access the next level.
2. Can't find the pass key to move on? No problem. It's located inside the trailer.
3. Make sure you press down hard on the "Y" button to access Jack's slow-motion dive, otherwise Slate will just do a quick jump in mid-air.

CHAPTER 2 DEN OF INEQUITY

Mission Breakdown

A. Distract Guards

B. Access Streets

C. Enter Hotel

Suggested Weapons:

.45 automatic pistol • Canisters
Shadow

Tips:

1. Don't watch Hildy during the strip sequence! (We know it's tough) Focus on the button prompts and keep in time with the music.
2. Locate the club's elevator switch to the left of the group of wall-mounted telephones. It's buried in the corner, so keep your eyes peeled!
3. The streets are swarming with thugs! Even up the odds a little by snagging a nicely hidden bulletproof vest behind the benches on the street's right-hand side.

FLAT LINE LOW NEUTRAL HIGH INSANE

"I liked this game better when it was called Max Payne"

CHAPTER 3 IRON POINT

Mission Breakdown

- A.** Earn 25 Packs of Cigarettes
- B.** Fight Sickie
- C.** Escape Prison

Suggested Weapons:

Shotgun • Canisters

Tips:

1. Minigames

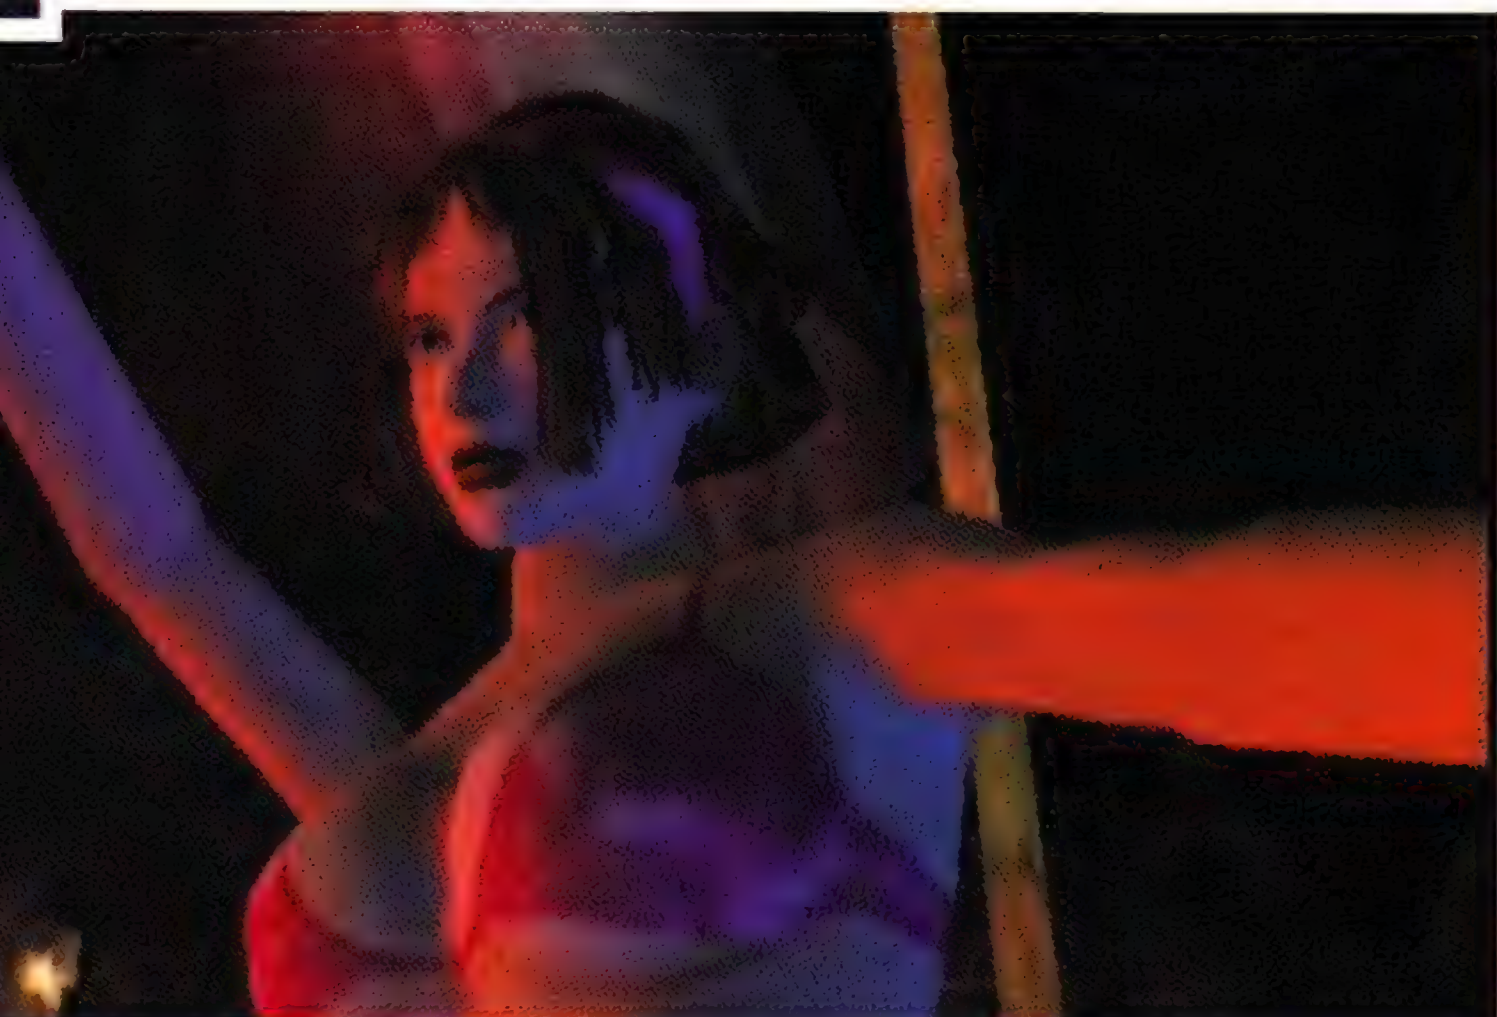

Boxing: Use a variety of moves (punches, kicks and throws) to win. Most people think you're limited to punches (boxing), but you're not!

Punching Bag: Ignore progressing to the next bag stage. Simply hit the bag more than 150 times, and you automatically win!

Weight Lifting: Position the controller so you can use one thumb for strength and one for stamina. Taking your thumb off the stamina button will make it harder to activate the strength boost.

Arm Wrestling: This one's tough. Keep the stamina gauge in the red zone so that your strength meter can build. Once it goes up more than half-way, activate the boost. Using it beforehand is tempting but futile.

- 2.** To beat Sickie, have him chase you and fake him out like you're going to stop. Move away suddenly and attack after he

finishes punching and kicking the air.

- 3.** When navigating the underground passageways, don't worry about performing a "wall hug" maneuver to traverse those narrow ledges. Simply run across.

CHAPTER 4 BLACK ORCHID

Mission Breakdown

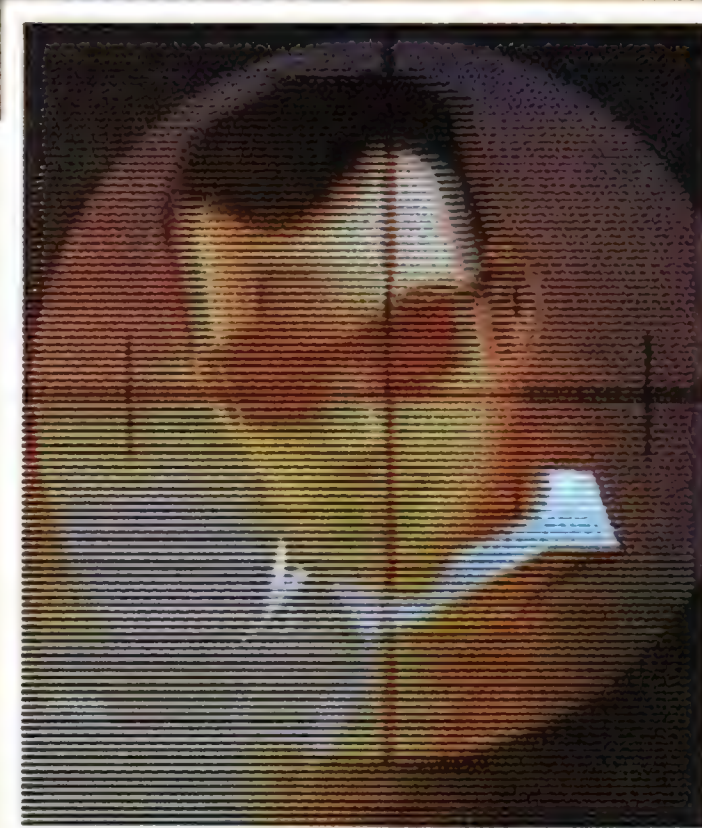

- A.** Pursue Fat Chow
- B.** Enter Massage Parlor
- C.** Protect Eve

Suggested Weapons:

AK47 • Shadow • Sniper Rifle

Tips:

- 1.** After you've cleaned out Fat Chow's, click on the door with the red indicator. You've just found Fat Chow and a locker filled with weapons!
- 2.** It is imperative to use the sniper rifle to take out the goons on the roof after Chow's. Otherwise, your chances of beating the level are next to none.
- 3.** Eve packs a gun, but is far from self-sufficient. Don't let her out of your sight unless it's to grab a weapon or health. She dies quickly and easily!

CHAPTER 5 A LATE GOODBYE

Mission Breakdown

- A.** Eliminate Clowns
- B.** Access Cage Room
- C.** Escape Graveyard

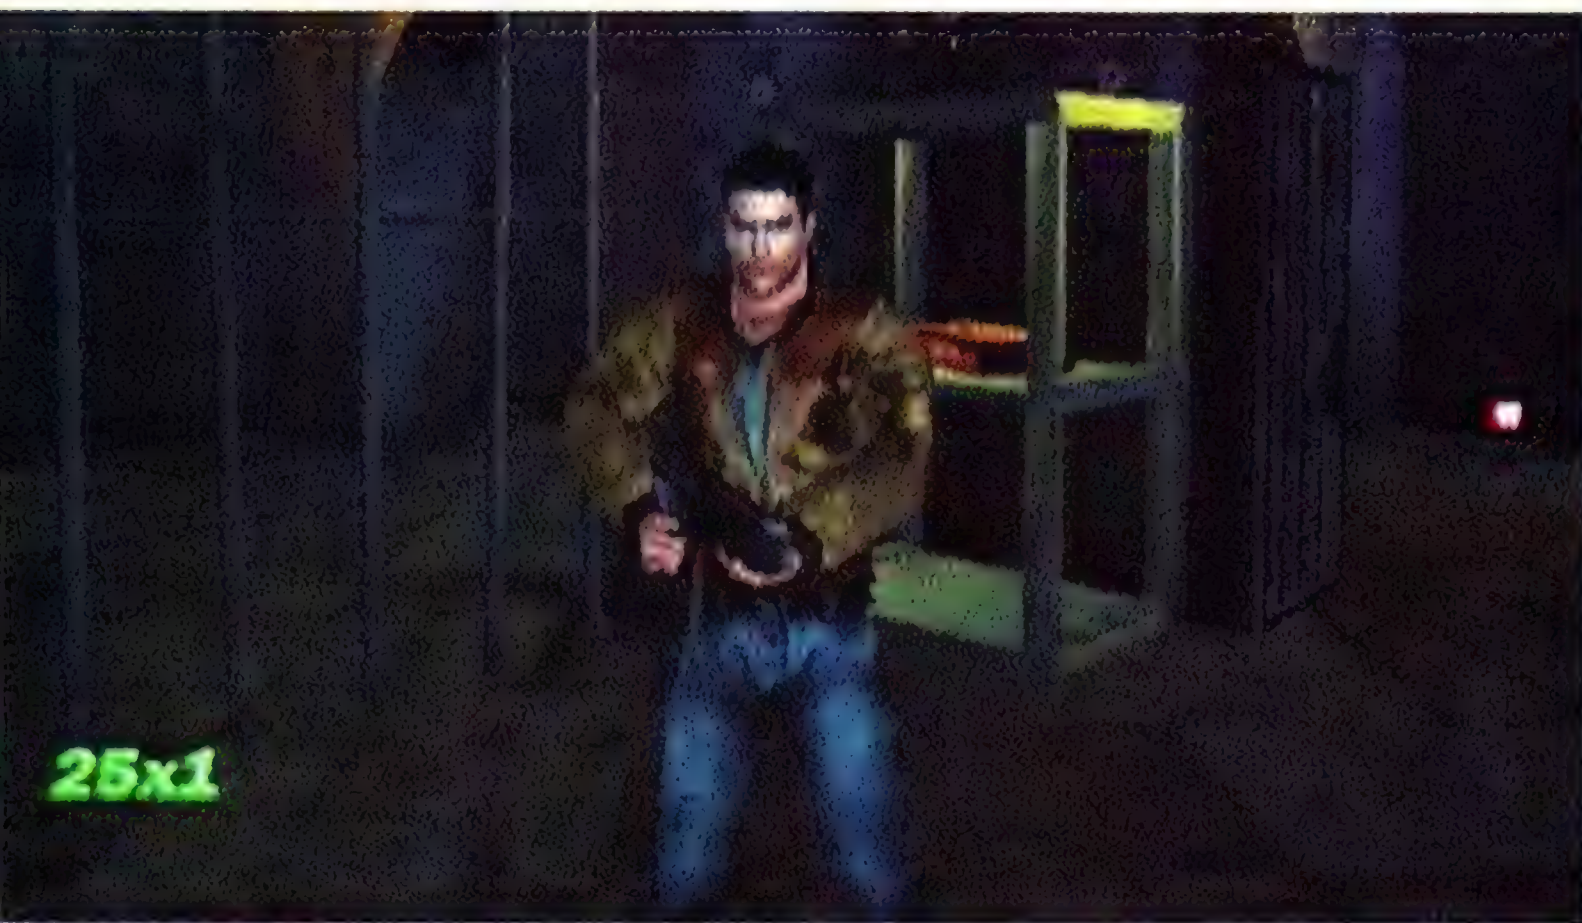

Suggested Weapons:

AK47 • MP5 • Shadow

Tips:

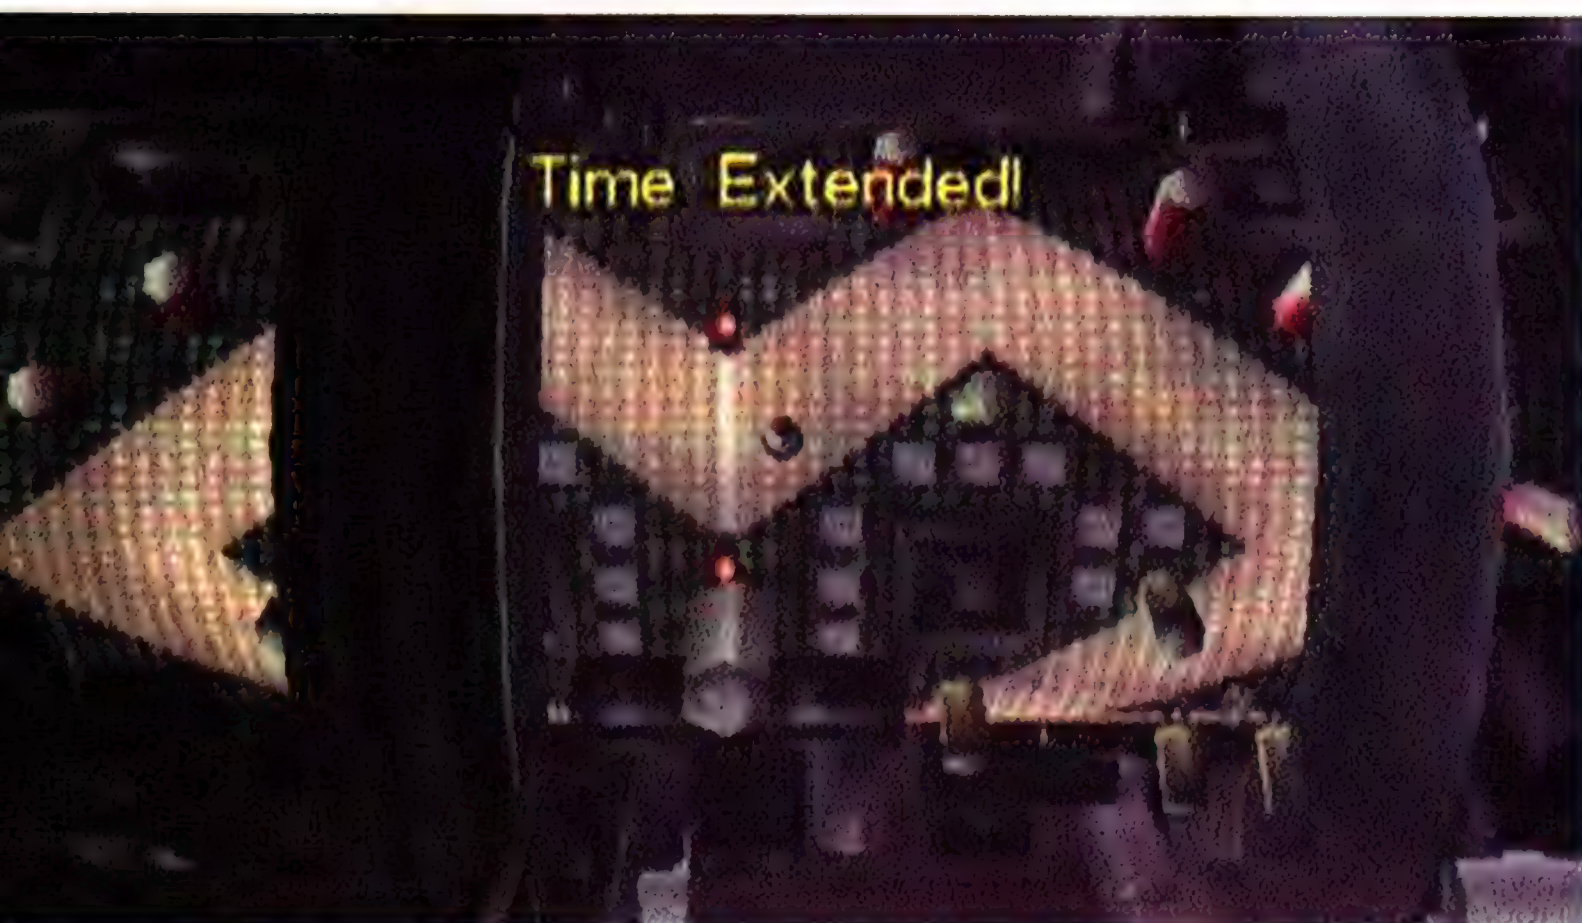

- 1.** Jokers have a much higher armor rate than clowns. Use them as human shields as often as possible—it's like having a bulletproof vest for free!
- 2.** Drop through the left circular grate on the hill to gain access

to the center "cage room" in the catacombs area. There is no access otherwise.

3. To destroy the van at the end, toss canisters at it repeatedly, shooting each one as it comes in contact with it. Attack only when the van is dormant.

CHAPTER 6 MAYHEM INCORPORATED

Mission Breakdown

- A. Protect Eve in Chopper
- B. Disarm 4 Bombs
- C. Eliminate Patch

Suggested Weapons:

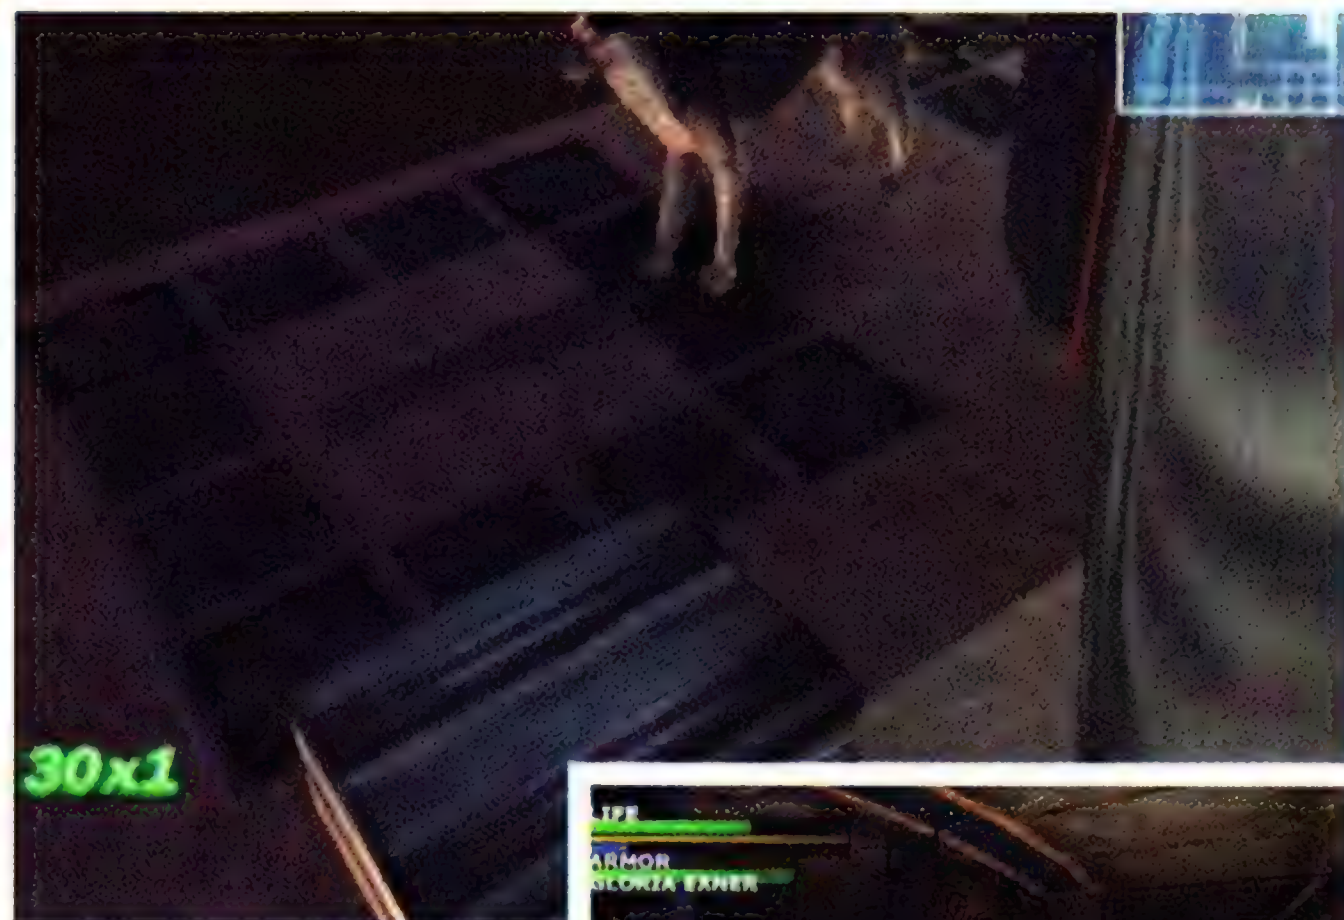

M60

Tips:

1. When picking off the henchmen, target their heads; one shot kills instantly!

2. Use both sticks simultaneously while disarming bombs to move the ball bearings and roll the bombs at the same time. Remember: Time's a factor!
3. To finish off Patch, you must shoot him and not the limo. Just keep your crosshairs on the sunroof and keep blasting, but watch out for those rockets!

CHAPTER 7 NO VACANCY

Mission Breakdown

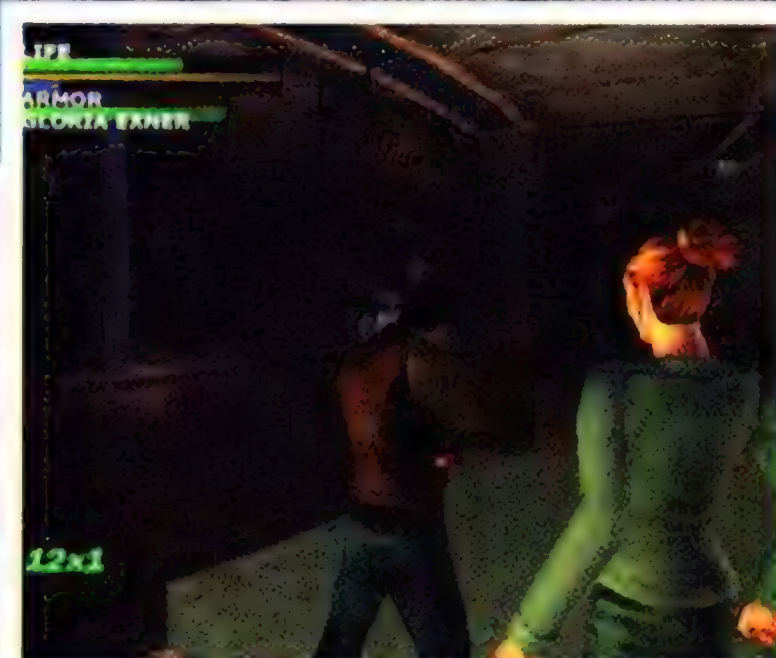

- A. Disarm Bombs
- B. Extinguish Fires
- C. Protect Gloria Exner

Suggested Weapons:

AK47 • Shadow

Tips:

1. Make sure to use Shadow's sniffing feature when looking for bombs; bomb locations will light up in the top-right corner on the map.
2. Don't partially extinguish flames merely to preserve coolant. In each instance, you will have more than enough to put out all the fires in each area.
3. Ironically, Gloria Exner is a little tougher than Eve, so keep cool when protecting her and stay focused on enemies. Just don't get too cocky!

CHAPTER 8 A BOATLOAD OF TROUBLE

Mission Breakdown

- A. Enter Factory
- B. Eliminate Guards
- C. Destroy Helicopter

Suggested Weapons:

MP5 • AK47 • Sniper Rifle
Rocket Launcher

Tips:

1. Snag wire cutters from the right side of the first dock to disable the alarm system to the factory; it's the only way to gain access to the front doors.

FLAT LINE LOW NEUTRAL HIGH INSANE

"I haven't seen time move this slowly since that Golden Girls marathon"

2. There is a bulletproof vest on a suspended platform hanging in the warehouse. Go to the second floor and walk to the corner. Fall slightly to reach the platform.
3. To down the chopper, grab the armor behind you and charge into the opening to snag the rocket launcher. Shoot the chopper in first-person mode.

CHAPTER 10 FULL CIRCLE

Mission Breakdown

- A. Kill Guards
- B. Destroy Chopper
- C. Escape Construction Zone

Suggested Weapons:

AK47 • Sniper Rifle

Tips:

1. In the construction zone, one trailer has armor and the other has a medical kit with a sniper rifle located inside. Take out the opposing snipers with the rifle.
2. When exiting the trailers, Shadow's targeting option becomes inactive on the steps, even though it looks like you can use him. Don't be fooled!
3. Always use first-person mode when targeting the chopper. Auto-switching seems to highlight ground targets and will only cause you to waste rockets.

CHAPTER 9 A BILLION IN BULLION

Mission Breakdown

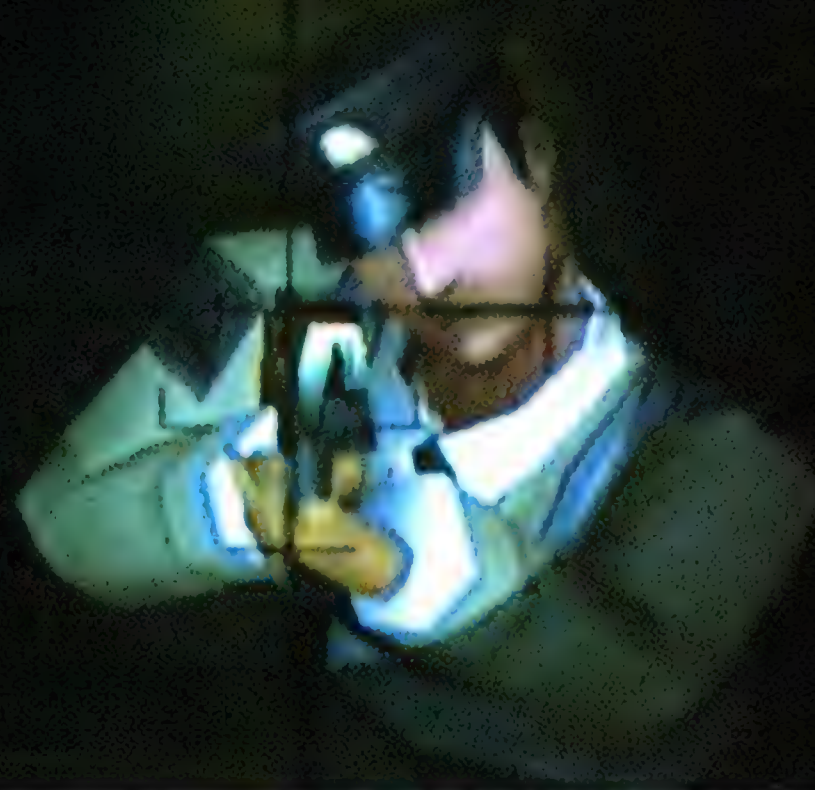

- A. Blow Up Turret
- B. Eliminate Tattoo
- C. Navigate Passageways

Suggested Weapons:

AK47 • Magnum • Flamethrower

Tips:

1. To eliminate the turret, grab the medical kit and armor by the stairs, run to the right, duck behind the crates, and shoot it from there in first-person mode.
2. To beat Tattoo, use the two left trailers for medical kits and armor. Then exit the trailers and follow tattoo around, circling him and blasting away with the AK47.
3. To take out the huge cluster of security guards in the last passageway, simply charge through with the flamethrower in one mad dash.

CHAPTER 11 POST-RIOT SYNDROME

Mission Breakdown

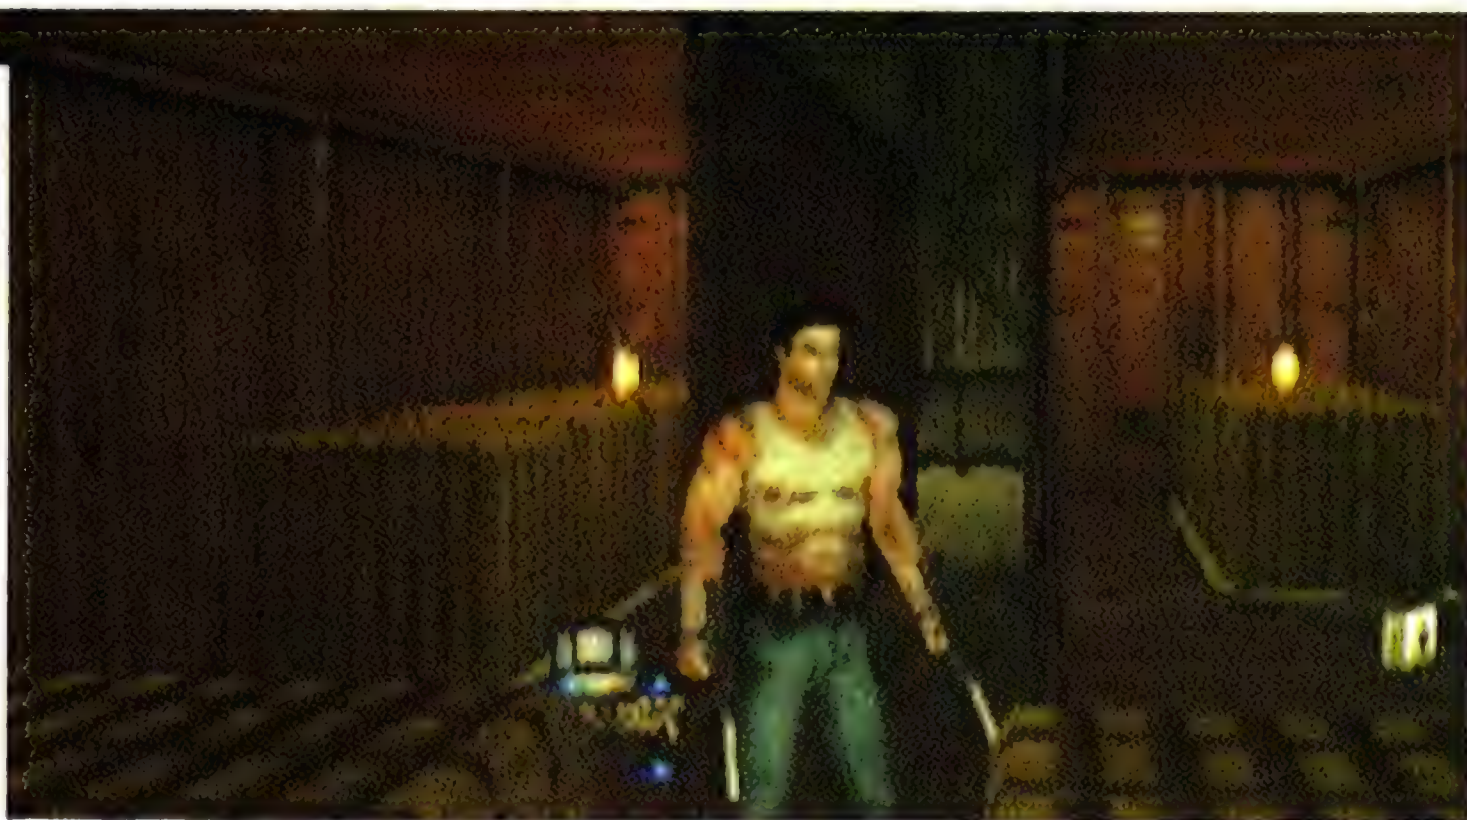

- A. Find Three Fuses
- B. Search for Mayor
- C. Fight Diggs

Suggested Weapons:

Double Barrel Shotgun • M60

Tips:

1. To find all three, travel to each cell block and completely wipe out all opposing enemies. Each fuse will become unlocked only when each area is clear.
2. When leaving the Warden's area, you will have to exit through two doors. Be extremely careful! There are

three hidden security guards on the other side!

3. To beat Diggs, walk backward and throw punches to catch him off-guard. If he falls on the O2 mask, attack him immediately to knock it off again.

CHAPTER 12 THE STASH

Mission Breakdown-

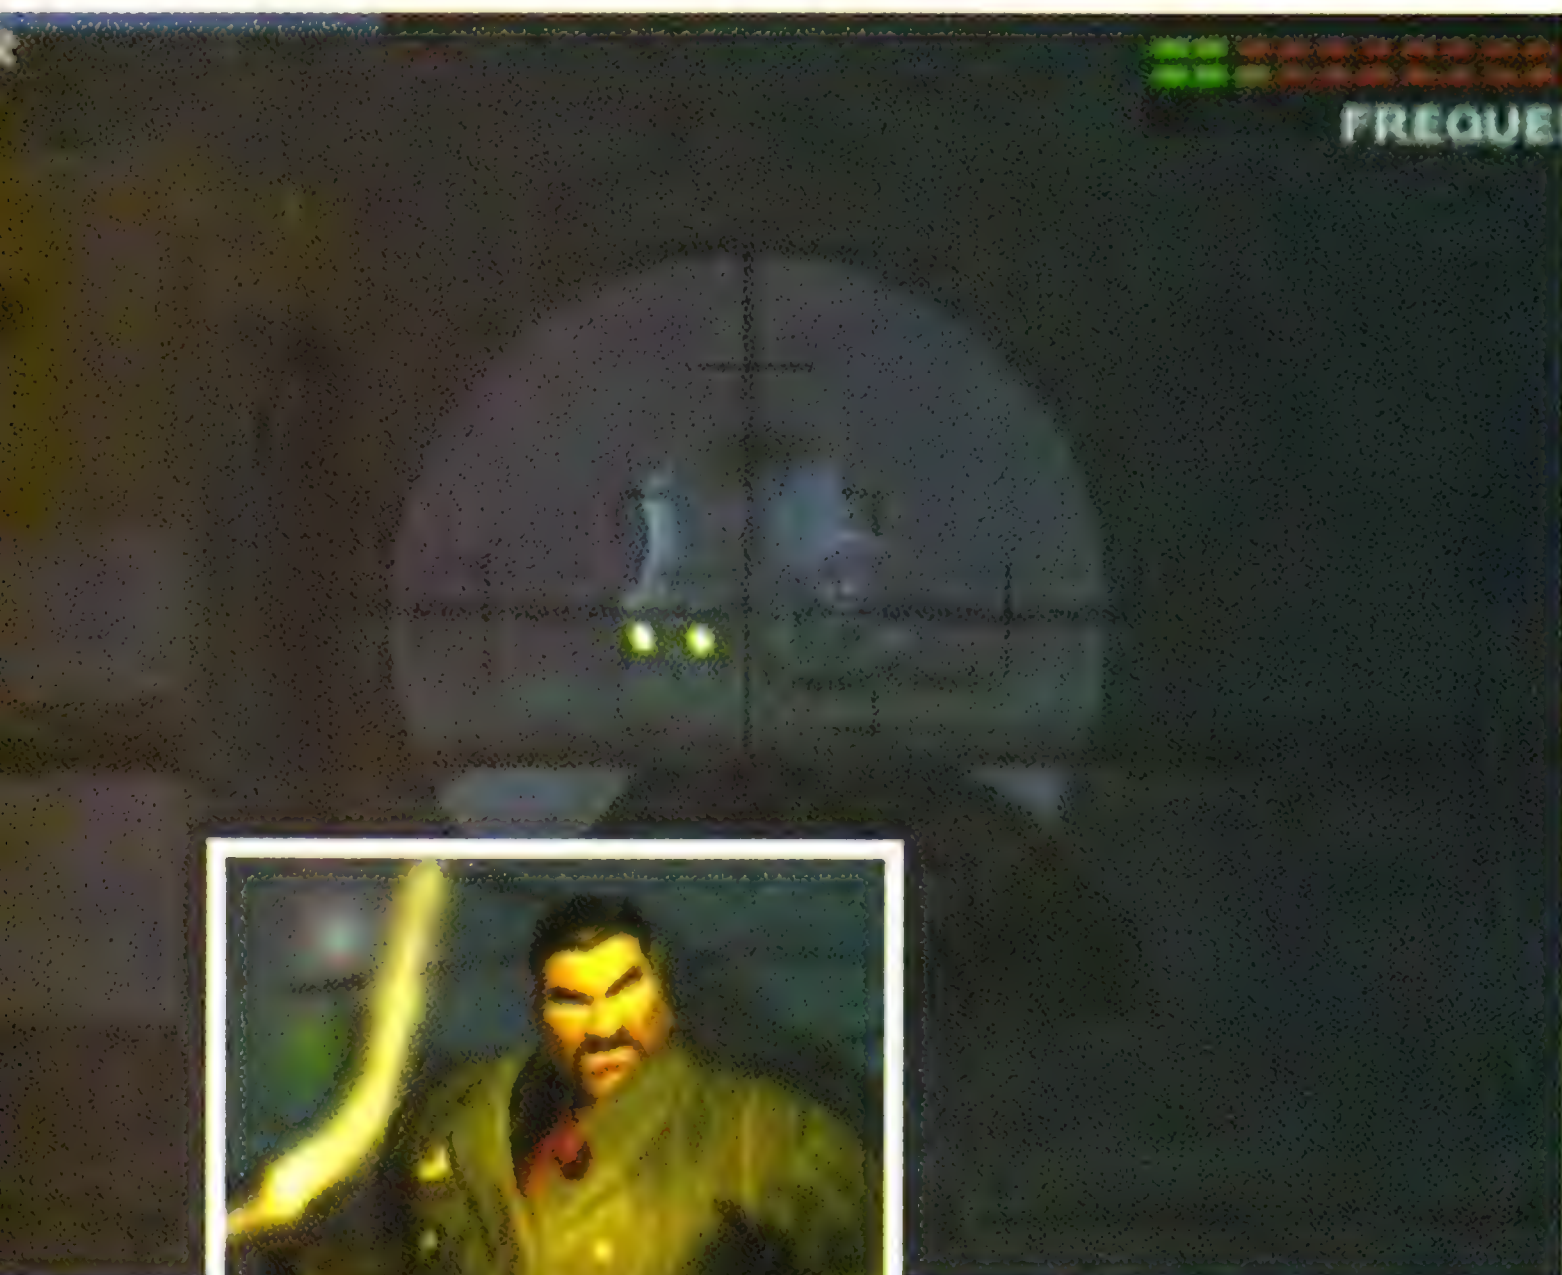

- A. GAK Communications
- B. Locate Evidence
- C. Fight Pinnacle

Suggested Weapons:

M60 • Automatic Shotgun • Sniper Rifle

Tips:

1. To easily eliminate the GAK member dialing up the frequency, target with the sniper rifle and wipe him out before dealing with the other guards.
2. To locate the evidence before escaping the station, follow the

numbered signs to area "6C." This place is like a maze, so use the signs as landmarks.

3. To beat Pinnacle, wear him down. When he hunches over to take a breather, hop on his back and hit the "A" and "B" buttons as fast as possible to strangle him.

CHAPTER 13 GREED

Mission Breakdown

- A. Gain Voice Access
- B. Destroy Chopper
- C. Eliminate Twins

Suggested Weapons:

M4 • AK47 • Shadow

Tips:

1. When the hostage talks into the voice box, immediately run for the gate. It's on a timer and enemies will just respawn as long as you stay in the yard.
2. To destroy the chopper, fire the bazooka from the cargo lift and run to the end of the dock so it can respawn. Run back, snag it, and fire it twice again. Voilà!

- 3.** To beat the Twins, take out the one with the machine gun first. She can shoot you much faster with it, whereas the grenades are easy to spot and need reloads.

CHAPTER 14 HEAVY CARGO

Mission Breakdown

- A.** Eliminate Guards
- B.** Defeat Fahook
- C.** Deactivate Bombs

Suggested Weapons:

MP5 • AK47

Tips:

- 1.** The plane is filled with bad guys! Use everything you've learned up to this point: bullet time, hostage taking and stealth. Remember, Shadow can't help you here.
- 2.** Fahook will fight you in two stages. Wear him down with machine guns to start and then target his drink in first-person view to finally finish him off.
- 3.** There are two bombs on the plane. Each one is a bomb you've defused before, so use instincts and memory to get the job done. Keep cool and you'll be fine!

CHAPTER 15 STORY OF THE CENTURY

Mission Breakdown

- A.** Destroy Chopper
- B.** Fight Hennessy by Fountain
- C.** by Furnace

Suggested Weapons:

Bazooka • M4 • Shadow

Tips:

- 1.** Shoot the chopper with the bazooka by the fountain, then run upstairs and shoot it with the bazookas by the balconies. Always use first-person mode.
- 2.** When fighting Hennessy the first time, put your back against the wall. He'll charge at you. Dodge him, and he'll get zapped over and over until he finally loses the battle.
- 3.** To finish Hennessy off, wear him down so he'll open the doors to the furnace. Lure him there and throw him into the furnace. Careful! He comes back briefly!

Congratulations! You've just finished *Dead to Rights*!

THE UNDERGROUND

SONIC CALLS NINTENDO HOME

TEN years ago someone saying that a host of new Sonic The Hedgehog titles would be released for a Nintendo platform would have been a perfectly legal reason for locking them away forever. Times have changed, however, and now the companies are working and playing together like Balki and the other guy from *Perfect Strangers*.

Sonic Advance 2 is on the way to Game Boy Advance, featuring more platform shenanigans with even brighter colors to combat the black hole that is otherwise known as the GBA screen. If that wasn't enough, fans of old-school gameplay will take a shine to Sonic Mega Collection on GameCube, which collects all the Sonic titles that appeared on the Genesis. Sonic 1-3, Sonic Knuckles and even the tenuously related Dr. Robotnik's Mean Bean Machine will be bundled on the disc, giving 16-bit classics a breath of fresh air. Just like how the record companies make us buy The Beatles all over again every few years, Sega is giving Sonic a shiny new makeover for a new generation of gamers. The greedy mongrels.

SEGA RERELEASES EVERY SINGLE CRAP GAME THEY EVER MADE FOR GBA

AFTER announcing the imminent rerelease of the old Sonic titles on GameCube and THQ's publishing of the legendary *Phantasy Star* series on the portable system, the inevitable has finally happened: Sega has cut to the chase and announced they'll be re-releasing all of their old games on the GBA—in one cartridge.

Titled "All the games that aren't really good enough to be released on their own but old people will still pay for the pleasure of playing them on a bus," the collection of 400 usually unplayable titles will use an unprecedented 1 Gigabyte ROM cartridge that requires an additional three AA batteries to keep running.

Included on the cart are "classics" such as *Pengo*, *Flicky* and the instantly forgettable *Dynamite Ducks*. If you've ever wondered about games with flashy graphics but little long-term appeal, you'll be able to play handheld iterations of *Thunderblade*, *Afterburner* and Michael Jackson's *Moonwalker*.

"We hope that in addition to being a profitable way to get everyone to buy our old games again, this will serve as a reality check for all those Sega fanboys out there," said Yuji Naka yesterday. "It's time to get real, people. We've released a ton of crap in our time. I mean, Alex Kidd in *Shinobi World*? What the hell were we thinking?"

IKAUGA: LAST EVER DREAMCAST GAME IS RELEASED

FROM the "Why Did They Bother?" department: Ikauga has finally been released for the Dreamcast. Yes, the Dreamcast. Sega's mighty console that has completely disappeared from the public consciousness for over a year now. You can't even buy one if you tried.

Exactly why this game was released to an otherwise uncaring Japanese public is not quite certain at press time, though we do know that Dreamcast fan sites around the world are hailing it as the greatest game ever made. We suspect it's only because they're sick to death of playing Crazy Taxi 2 over and over again.

FINAL FANTASY XI: PS2 GETS ONLINE. WILL PLAYERS FOLLOW?

FINAL Fantasy XI is out—in Japan, that is. Given Square's penchant for releasing a new Final Fantasy game every few weeks, this new release would not be newsworthy except for the fact that this is the first big test for Sony's broadband adapter and online gaming service.

The game, which is more like *EverQuest* than the storyline-driven Final Fantasy that we've all grown to know and tolerate, has been plagued from the start. Players have reported numerous connection problems, inventory items going missing, and woe-ful lag (the time between the player issuing commands and the character performing the attacks) since day one. To make matters worse, players had to pay for the privilege of downloading a patch program designed to fix errors in the main game, a process that took several hours to complete.

PC gamers have had to endure this kind of treatment for years, and now that hard drives and broadband adapters are becoming standard equipment in the world of con-soles, get ready for more of the same...

HIDEO KOJIMA'S SECRET DIARY

Known to gamers worldwide as the man behind the Metal Gear series, Hideo Kojima has been very quiet of late. Since the lackluster reaction to the befuddling story line (and downright stupid ending) of Metal Gear Solid 2: Sons of Liberty, Kojima-san has remained out of the public eye. What secrets is he hiding? The crack team of Code Warriors behind *Video Games Underground* snuck into Konami's Japanese fortress, Solid Snake-style, and stole a few pages from his diary:

Monday

9a.m.: Got into work. Made myself coffee.

9:01a.m.: Stared at the wall and started pondering the meanings of fatherhood, DNA and virtual reality in a world full of Machiavellian computer networks and religious uprisings.

4:55p.m.: Drank my coffee. Went home.

Tuesday

10a.m.: Meeting with Konami's marketing team to discuss the next eight Metal Gear sequels. I suggest MGS 5 features a group of flamenco dancers trying to save the world from Metal Gear Ben, a nuclear-powered panda bear. They laugh. I tell them that I am serious. They cough nervously.

Wednesday

3p.m.: I play through the latest version of Metal Gear Substance. The programmers have added an option to shoot Raiden into the center of the sun.

Thursday

12p.m.: Yuji Shinkawa and I discuss the artistic style of Metal Gear Solid 3: Snake Goes Skiing. I ask that he make Snake look less like a tough hero and more like Ricky Martin. He laughs. I tell him that I am serious. He weeps openly.

Friday

9a.m.: Today will be dedicated to answering fan mail from around the world.

9:01a.m.: I start by deleting all the ones complaining about the ending of Sons of Liberty.

4:55p.m.: Time to go home. Maybe next week I will write a reply.

WORLD OF GAME BOY GETTING BIGGER—WILL THE MADNESS NEVER END?

Apparently it's not enough that you can buy a regular old Game Boy Advance and play some cool games on it. Three new developments have taken the Afterburner's lead and expanded the machine's functionality—not to mention size.

Coming soon to a games store near you are the TV Advance (an unlicensed accessory that will allow you to watch *Gilmore Girls*—and don't deny that you do—anywhere you go), the MP3 player from SongPro (want to groove along to Weezer in between rounds of Super Mario Kart? For \$99 this can become a reality) and finally, a new line of GBAs with Pokémon characters on them from Nintendo (shudder).

Rumors that a DVD player for the GBA will be released soon remain unconfirmed at press time.

NEW LAW DICTATES THAT VOLLEYBALL GAMES ARE MANDATORY

STOP THE PRESS: VGU's Washington office reports that Congress is passing legislature making development of volleyball games mandatory for every game company worldwide. The law, entitled the We Love The Boobies Act, is responsible for the current wave of volleyball titles flooding the market.

After Dead Or Alive Volleyball, Beach Spikers and Klonoa Volleyball, sand and ball-loving gamers will thrill to the fleshy delights of Romance of The Three Kingdoms Hit The Beach, Metroid Set And Spike and 3DO's entry, Army Men Net Patrol. You have been warned.

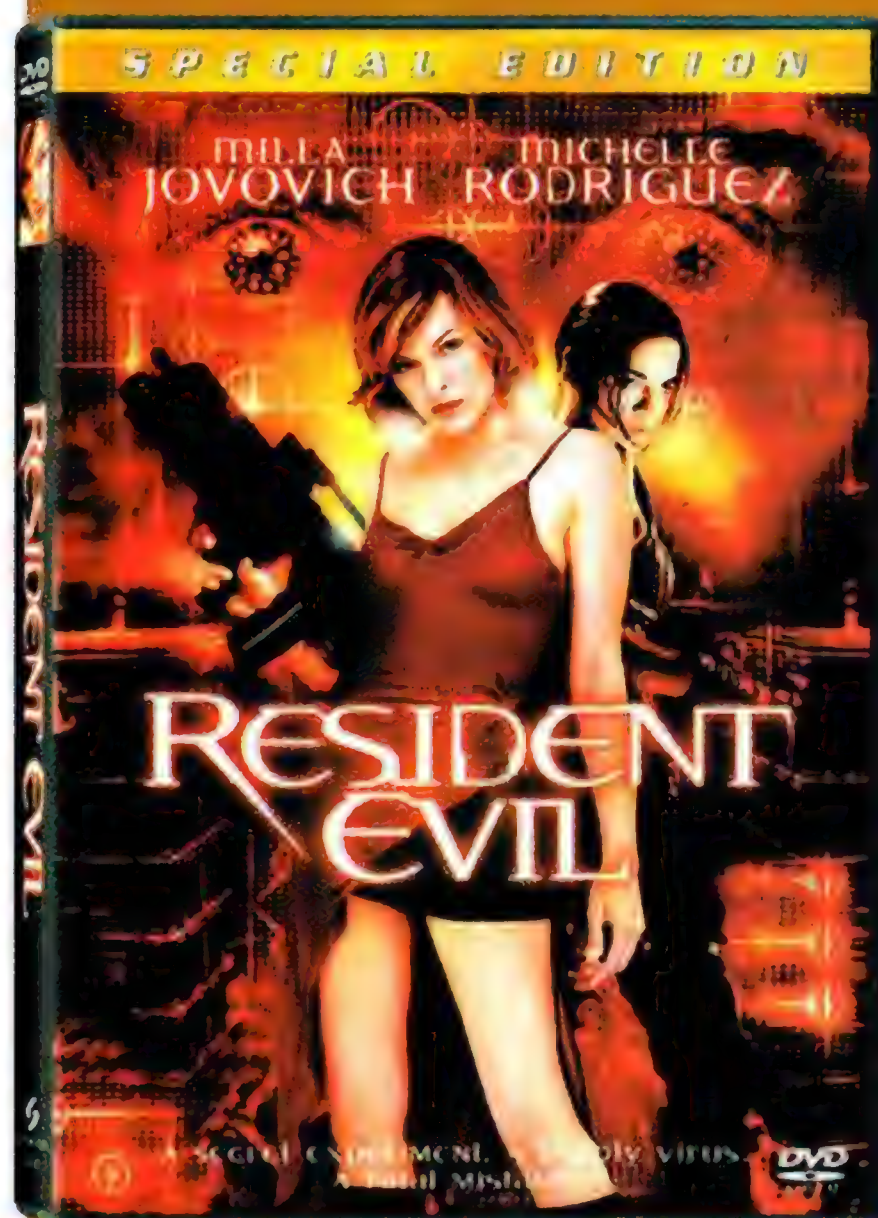

RESIDENT EVIL DVD REVIEW

By Herbert Zitowski

WAKING up bright and early to be first in line at Best Buy at 10 a.m. the day the Resident Evil DVD came out, I anticipated a scary mob scene of Resident Evil fanboys waiting for me, but only a few Best Buy dayshift employees were there waiting for the manager to show up with the keys. Bingo! I was in luck! I would be the first on my block to see the movie and post my reviews on messages boards all over the Net!

I rushed home to fire the disc up—only to remember that Tuesday is also the day Toys R Us gets new action figures in, so I hopped back on my bike to make sure I didn't lose any of the new Dragon Ball Z figures I had on pre-order. By the time I got home it was almost time for *Enterprise* on UPN so I had to watch that, of course, before I could start the movie. During *Enterprise* I did play Resident Evil on my GameCube, ate a bag of M&M's, drank a Code Red and actively posted my comments about all of the above online (and bragged to all who would listen that I had the *Resident Evil* DVD before they did).

At 9 p.m. I finally popped the disc in and flipped to the most important part of any DVD—Special Features.

I zipped through one of the mini features on the movie about Zombie Makeup Tests (which was kind of gross), then watched the Slipknot video for "My Plague." It was so loud that it broke one of my eardrums and my mother pounded on the ceiling of my bedroom (I live in the basement). I'll never watch that video again, that's for sure.

Seeing that I already knew the plot of the movie after viewing the theatrical release several times, I selected to watch the film with the audio commentary dubbed over the soundtrack. I was pleasantly surprised that Milla Jovovich was one of the commentators. Whewee! I can watch the movie and think that a real woman is talking to me the whole time! Since my dungeon master is presently borrowing my *The Fifth Element* DVD, it's sure nice to have another DVD around with Milla in it.

So the movie starts off and I can't help myself from comparing it to the Resident Evil games—waiting for them to screw something up so I could rant about it on IRC (Internet Relay Chat) on channel #geekswithnolife, of course. But for the most part it's a pretty entertaining film that roughly follows the plots of the first three RE games. The film is packed with atmosphere and style and the 1.85:1 anamorphic transfer is hard to find fault with—i.e., no artifacts to speak of whatsoever.

One problem I had with the film's soundtrack is that there are long periods where it's quiet followed by very loud crashes. I kept turning my 5.1 surround system up during the quiet parts....then when an explosion would rattle my entire action figure collection off the shelves and wake my mom up, I had to turn it back down. Headphones are probably a good solution for any of us who are still in the nest, so to speak.

Overall, I have to give the DVD a thumbs up. It's a good representation of a game that has gone Hollywood successfully, more in the lines of films like *Lara Croft: Tomb Raider* than the abysmal *Super Mario Bros.* I'll have to go through this all again when the two-disc Special Edition Director's Cut comes out in 2003...

**Sony
releases
even more
colored
PS2s**

YOU thought the limited-edition colored PS2s were pretty cool—check out the latest colors that Sony has painted their 128-bit baby with. The "Ocean Blue" and "Zen Black" PS2s are the latest in chic, and should prove to be a hit with people who have too much money to spend through Ebay, as they're only available in Japan at this time. "Island Blue"- and "Emerald"-colored controllers and memory cards have also recently gone on sale in the land of the rising sun.

In a related statement, Sony has issued a public appeal for more colors to be invented. "We've plum run out of ideas," Ken Kutaragi said as he tried mixing red with another shade of red in Sony Japan's basement. "I mean, the best we can come up with right now is plaid. I mean, is that even a color?"

P5 GLOVE (PC/PS2/XBOX)

Essential Reality

Essentialreality.com

\$129-\$149

Remember how kick-ass the Nintendo Power Glove was? Us neither. But, as history is wont to repeat itself – and companies are wont to lust for every niche market available – Essential Reality has created its spiritual successor. Plug it into a USB port and achieve full 3D motion with hand and finger movements. How this is beneficial to play... no comment. Curious, yes, but worrisome too – one can't help but suspect they're always one power surge away from impotence.

\$89.95

Just as gaming began to garner some respect as a hobby, someone dropped the bomb. Their invention: insanely geeky goggles that provide realistic 3D visuals for PC-specific titles. Sure, lightweight eyewear that actually enhances play throughout Clive Barker's Undying, Half Life: Counterstrike, and NHL 2002 is a novel idea. Lord knows it isn't worth its weight in swirlies, however; you'll likely enjoy the fun all of three seconds before the neighborhood bully pounds you back to normalcy.

GAMERIDER MODEL GR3 (PSOne/PS2)

CycleFX

Cyclefx.com

Flab is bad. A Friday night date with only French fries for company is worse. Lose the gut with a stationary exercise bike that powers dozens of compatible racing games. Pedal faster for increased speeds, and steer with the handlebars; amazingly, the system performs as advertised. Custom pace settings and button attachments also enhance workouts. Three downsides, though; high price point, manual setup is involved, and the 265lb weight limit. Damn... back to fork to mouth training programs it is.

FIGHTING ARENA

Thrustmaster

Thrustmaster.com

\$69.99

Punch. Kick. Karate chop. The plot of the latest Jackie Chan flick, and preferred method of controlling fighters using this nifty virtual reality gadget. Pole-mounted sensors track movement and blows with floor-mounted pad buttons supplementing the handling scheme. Not the world's most accurate tracking device, but somewhat enjoyable, if only to see the living room carnage that's ensued after your fearsome, painfully uncoordinated berserker rage subsides.

MOBILE MONITOR 5.4 (GAMECUBE)

InterAct

Goodbye, social life! Cop one of these nifty 5.4" hi-res LCD displays that attaches right onto a GameCube, and boom – portable gaming at its finest. Both car adapter (included) and external power supply support is built-in, as is A/V input in case a spare DVD player or VCR is handy. For audiophiles, two stereo speakers provide welcome tunes all the while. The only thing missing... bail money for head-on collisions sure to be suffered whenever Mario needs rescuing during rush hour commutes.

NEW MORTAL KOMBAT GAME DELAYED: WORLD IN CRISIS

MIDWAY has announced that the latest installment of the tired Mortal Kombat franchise, Mortal Kombat: Deadly Alliance, has been delayed until December.

"This is terrible, terrible news," said President Bush in an emotional statement from the White House last night. "We're not quite sure how to handle such a dramatic announcement like this." Other celebrities begged the general public not to panic during the long wait until the game's Yuletide release.

"Please, just be calm," urged the hot chick from *Growing Pains*. "It is only an extra two months that we, as a nation, must patiently await being disappointed by this no doubt substandard game."
